Thinking About Science:

Thinking about Science Ferric C. Fang, Arturo Casadevall, 2023-10-09 Thinking about Science Good Science Bad Science and How to Make It Better A riveting exploration of the world of science diving headfirst into its triumphs and tribulations Penned by seasoned microbiologists Ferric C Fang and Arturo Casadevall this book offers a comprehensive analysis of the scientific enterprise through various lenses including historical philosophical and personal From their unique vantage points as researchers clinicians and educators Fang and Casadevall dissect the intricate mechanisms of science shedding light on its strengths and weaknesses Through engaging historical anecdotes personal narratives and insightful academic studies they present a candid evaluation of science s performance including a thought provoking examination of its role during the COVID 19 pandemic A must read for anyone curious about the present predicaments and future potential of science Thinking about Science Good Science Bad Science and How to Make It Better is more than just a book it s a roadmap to understanding and improving the scientific endeavor for the benefit of society at large The authors have given us a thoughtful description of science and the joy of discovery an unflinching diagnosis of where improvements are needed and recommendations for remedies well worth considering Scientists science and society would benefit if this book were read by both future and established scientists as well as the administrators policymakers and regulators who are in a position to help us do better Michael Kalichman UC San Diego With a deep understanding of the profound impact of science on society the authors provide thought provoking perspectives on changes in the scientific enterprise that will support sustainable equitable practices and engender public trust An engaging read for everyone with an interest in science or science policy Stanley Maloy San Diego State University

Re-Thinking Science Helga Nowotny, Peter B. Scott, Michael T. Gibbons, 2013-04-24 Re Thinking Science presents an account of the dynamic relationship between society and science Despite the mounting evidence of a much closer interactive relationship between society and science current debate still seems to turn on the need to maintain a line to demarcate them The view persists that there is a one way communication flow from science to society with scant attention given to the ways in which society communicates with science The authors argue that changes in society now make such communications both more likely and more numerous and that this is transforming science not only in its research practices and the institutions that support it but also deep in its epistemological core To explain these changes Nowotny Scott and Gibbons have developed an open dynamic framework for re thinking science The authors conclude that the line which formerly demarcated society from science is regularly transgressed and that the resulting closer interaction of science and society signals the emergence of a new kind of science contextualized or context sensitive science The co evolution between society and science requires a more or less complete re thinking of the basis on which a new social contract between science and society might be constructed In their discussion the authors present some of the elements that would comprise this new social contract

Critical Thinking, Science, and Pseudoscience Caleb W. Lack, Jacques

Rousseau,2016-03-08 This unique text for undergraduate courses teaches students to apply critical thinking skills across all academic disciplines by examining popular pseudoscientific claims through a multidisciplinary lens Rather than merely focusing on critical thinking grounded in philosophy and psychology the text incorporates the perspectives of biology physics medicine and other disciplines to reinforce different categories of rational explanation The book is also distinguished by its respectful approach to individuals whose ideas are according to the authors deeply flawed Accessible and engaging it describes what critical thinking is why it is important and how to learn and apply skills using scientific methods that promote it The text also examines why critical thinking can be difficult to engage in and explores the psychological and social reasons why people are drawn to and find credence in extraordinary claims From alien abductions and psychic phenomena to strange creatures and unsupported alternative medical treatments the text uses examples from a wide range of pseudoscience fields and brings evidence from diverse disciplines to critically examine these erroneous claims Particularly timely is the text s examination of how using the narrative of today s culture wars religion and culture impact science The authors focus on how the human brain rife with natural biases does not process information in a rational fashion and the social factors that prevent individuals from gaining an unbiased critical perspective on information Authored by a psychologist and a philosopher who have extensive experience teaching and writing on critical thinking and skeptical inquiry this work will help students to strengthen their skills in reasoning and debate become intelligent consumers of research and make well informed choices as citizens Key Features Addresses the foundations of critical thinking and how to apply it through the popular activity of examining pseudoscience Explains why humans are vulnerable to pseudoscientific claims and how critical thinking can overcome fallacies and biases Reinforces critical thinking through multidisciplinary analyses of pseudoscience Examines how religion and culture impact science Enlightens using an engaging entertaining approach Written by experienced and innovative scholar educators well known in the skeptic community Features teaching resources including an Instructor s Guide and Powepoint slides **The Christian Science Journal** ,1924 Thinking Ahead in Science Willard J.

Jacobson,1965 **School Science** ,1904 *Problem Solving and Critical Thinking for Computer Science Educators*
Cathleen A. Norris,James L. Poirot,1991 The eight papers presented in this monograph are a result of the Problem Solving and Critical Thinking Research Workshop that was held in conjunction with the 1990 National Educational Computing Conference NECC The intent of the workshop was to provide a unique forum for researchers to share ideas in a special area of educational computing The monograph provides an overview of the general issues of problem solving and critical thinking in education as well as specialized areas of interest in intelligent tutoring and program construction The papers included in this monograph are 1 Problem Solving Critical Thinking and Computing An Overview Cathleen A Norris and James L Poirot 2 Mindstorms Revisited Computers Problem Solving and Knowledge based Instruction Karen Swan 3 Defining Programming and Logo as Vehicles for Developing Higher Order Thinking Skills Jim Dunne 4 Abstracted Knowledge A Mid Road Transfer
