The Biden administration is reportedly debating removing Hayat Tahrir al Sham (HTS) from the list of designated Foreign Terrorist Organizations. However, while the group's leader, Abu Muhammad al Jolani, a Specially Designated Global Terrorist, attempts to portray HTS as moderate, a host of jihadist groups—many of whom are designated as Foreign Terrorist Organizations—fight under the banner of or are allied with HTS.

Understanding Terror Networks Marc Sageman, 2011-09-21. For decades a new type of terrorism has been quietly gathering ranks in the world. America's ability to remain oblivious to these new movements ended on September 11, 2001. The Islamist fanatics in the global Salafi jihad, the violent revivalist social movement of which al Qaeda is a part, target the West but their operations mercilessly slaughter thousands of people of all races and religions throughout the world. Marc Sageman challenges conventional wisdom about terrorism, observing that the key to mounting an effective defense against future attacks is a thorough understanding of the networks that allow these new terrorists to proliferate. Based on intensive study of biographical data on 172 participants in the jihad, *Understanding Terror Networks* gives us the

first social explanation of the global wave of activity Sageman traces its roots in Egypt gestation in Afghanistan during the Soviet Afghan war exile in the Sudan and growth of branches worldwide including detailed accounts of life within the Hamburg and Montreal cells that planned attacks on the United States U S government strategies to combat the jihad are based on the traditional reasons an individual was thought to turn to terrorism poverty trauma madness and ignorance Sageman refutes all these notions showing that for the vast majority of the mujahedin social bonds predated ideological commitment and it was these social networks that inspired alienated young Muslims to join the jihad These men isolated from the rest of society were transformed into fanatics yearning for martyrdom and eager to kill The tight bonds of family and friendship paradoxically enhanced by the tenuous links between the cell groups making it difficult for authorities to trace connections contributed to the jihad movement s flexibility and longevity And although Sageman s systematic analysis highlights the crucial role the networks played in the terrorists success he states unequivocally that the level of commitment and choice to embrace violence were entirely their own

**Understanding Terror Networks** combines Sageman s scrutiny of sources personal acquaintance with Islamic fundamentalists deep appreciation of history and effective application of network theory modeling and forensic psychology Sageman s unique research allows him to go beyond available academic studies which are light on facts and journalistic narratives which are devoid of theory The result is a profound contribution to our understanding of the perpetrators of 9 11 that has practical implications for the war on terror

**Globalisation and the New Terror** David Martin Jones,2004 Examines trends in new terror understood here to be the capacity of sub state actors to secure religious or politically motivated objectives by violent means Argues that while the use of violence to achieve political ends is scarcely original what distinguishes new terror is its potential for lethality Australian author

*Televising "terrorism"* Philip Schlesinger,Graham Murdock,Philip Ross Courtney Elliott,1983 Looks at how terrorism is portrayed in the British media both news and fictional television programs and discusses whether this coverage supports the government or gives undue influence to terrorist organizations

**Asian Bulletin** ,1981 The Theory and Practice of Islamic Terrorism Marvin Perry,Howard E. Negrin,2008-10-15 Drawing from a variety of sources this anthology encourages readers to explore the multiple dimensions of Islamic terrorism and seeks to promote a better understanding of one of the most complicated and urgent problems facing the world today Divided into six parts the book deals with the theological and ideological background of the concept of jihad the policies and organization of Al Qaeda various policy recommendations for combating terrorism the motivations of suicide bombers the dilemma jihadists pose in Western countries and the adoption of classical European and anti Semitic myths for political and religious gain in segments of the Muslim world With excerpts ranging from works by Sayyid Qutb to Osama bin Laden to Nonie Darwish this book is a must have for anyone interested in or studying Islamic terrorism

Networks and Netwars John Arquilla,David F. Ronfeldt,2001 Netwar like cyberwar describes a new spectrum of conflict that is emerging in the wake of the information revolution Netwar includes conflicts waged on the one hand by

terrorists criminals gangs and ethnic extremists and by civil society activists such as cyber activists or WTO protestors on the other What distinguishes netwar is the networked organizational structure of its practitioners with many groups actually being leaderless and their quickness in coming together in swarming attacks To confront this new type of conflict it is crucial for governments military and law enforcement to begin networking themselves
