Blades, Joseph M. Siracusa, 2014-05-01 The story of U S nuclear testing between 1945 and 1963 is a vivid and exciting one but also one of profound importance It is a story of trailblazing scientific progress weapons of mass destruction superpower rivalry accidents radiological contamination politics and diplomacy The testing of weapons that defined the course and consequences of the Cold War was itself a crucial dimension to the narrative of that conflict Further the central question Why conduct nuclear tests was fully debated among American politicians generals civilians and scientists and ultimately it was victory for those who argued in favor of national security over diplomatic and environmental costs that normalized nuclear weapons tests *A History of U S Nuclear Testing and Its Influence on Nuclear Thought 1945 1963* is an examination of this question beginning with the road to normalization and later de normalization of nuclear testing leading to the Nuclear Test Ban Treaty in 1963 As states continue to pursue nuclear weaponry nuclear testing remains an important political issue in the twenty first century **The Test Drive** Avital Ronell, 2010-10-01 The Test Drive deals with the war perpetrated by highly determined reactionary forces on science and research How does the government at once promote and prohibit scientific testing and undercut the importance of experimentation To what extent is testing at the forefront of theoretical and practical concerns today Addressed to those who are left stranded by speculative thinking and unhinged by cognitive discourse The Test Drive points to a toxic residue of uninterrogated questions raised by Nietzsche Husserl and Derrida Ranging from the scientific probe to modalities of testing that include the limits of friendship or love this work explores the crucial operations of an uncontestable legitimating machine Avital Ronell offers a tour de force reading of legal pharmaceutical artistic scientific Zen and historical grids that depend upon different types of testability involving among other issues what it means to put oneself to the test *Nuclear Shadowboxing* Vladimir Minkov, Vadim Simonenko, George Stanford, 2005 **Deconstruction Is/in America** Anselm Haverkamp, 1995 What impact has deconstruction had on the way we read American culture And how is American culture itself peculiarly deconstructive To address these questions this volume brings together some of the most provocative thinkers associated with deconstruction among them Jacques Derrida Judith Butler and Avital Ronnel Ranging across a wide field from the ethics of reading to the rhetoric of performance the contributors offer provocative insights into a new sense of the political The America of the volume's title turns out to be the place where the politics and poetics of responsibility meet It is also the place where we confront the tension between difference and profound otherness *Bulletin of the Atomic Scientists* , 1996-09 The Bulletin of the Atomic Scientists is the

premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world **Matériel Culture** Colleen M.
