The Future of Remote Teams Andrew Filev, 2012. As many as 65 percent of workers predict their offices will go fully virtual within the next few years according to a survey run by Wrike Inc. Thanks to the rapid development of web technologies, it has become quite typical for many project teams to work as a human cloud. Wrike's survey observed how people's current scope of virtual collaboration compares with their work styles two to three years ago, where remote work remains among the fringe benefits and much more. This paper highlights the findings of the survey and shows how workers see the future of virtual offices in the next five years. It also identifies what things affect this trend the most. The paper analyzes the main productivity hindrances that virtual teams face and discusses ways of making remote project collaboration smooth and efficient without regular face-to-face meetings. It offers suggestions to fine-tune collaboration across distances.
