

# NUTRITION

## A BALANCED DIET

- Your body needs a constant supply of fuel to grow, develop and stay healthy.
- The fuel you need comes from the air you breathe, the food you eat and the water you drink.

### WATER

Our bodies are 70% water.

### CARBOHYDRATES

They give us energy. Carbohydrates are split into sugars (fast burning) and starches (long lasting).

### PROTEINS

They help growth and repair cells, including teeth and nails.

#### Sugars

#### Starches

### FIBRE

It is not absorbed into the body but helps digestion and excretion.

### VITAMINS & MINERALS

They provide protection against illness and keep the body healthy.

### FATS

They give us slow releasing energy. Too much fat can lead to obesity and heart disease.

Exercise is also an important element of staying healthy.

Remember: **KEEP HEALTHY!**
