therapist designed for pathological gratification and defense and for temporary symptom relief without insight or adaptive inner change Temporarily successful efforts of this kind are termed misalliance cures while framework cures refers to their achievement through an alteration in the ground rules and boundaries The importance of unconscious perception along with unconscious fantasy as the key intrapsychic factors in the therapeutic and in the patient s psychopathology and the role of projective and introjective identification as the central interactional processes within the bipersonal field The distinction between transference and non transference reactions within the patient and its crucial technical implications The concept of interactional syndromes and resistances These are symptoms and defenses in the patient to which the therapist has significantly contributed They represent the pathology of the bipersonal field and can only be modified through rectification of the therapist s contributions and interpretation of their unconscious meanings for the patient The utilization of dreams in psychotherapy including the function of dreams as a means of communicating both unconscious fantasies and unconscious perceptions A special group of dreams ins identified as designed unconsciously to cure the pathology of the bipersonal field The patient s introjective identification of the therapist s pathological projective identifications which are generated by errors in intervening and mismanagements of the frame Based on his introjections the patient unconsciously attempts to cure the sick therapist within himself and thereby both the therapist and himself In this connection Dr Langs describes the patients and other unconscious therapeutic endeavors on his behalf In all this is a landmark book that opens many new avenues for understanding the therapeutic interaction and for redefining the basic techniques needed for the insightful resolution of the patient s psychopathology Dr Langs s work is founded on a distinctive psychoanalytic methodology and on repeated use of the validating process He works predictively and adheres closely to the material from the patient Never before has a psychoanalyst so exquisitely demonstrated the patient s unconscious perceptiveness and astonishing creativity Here is an opportunity to become involved in a clinical study that will prove a most memorable learning experience Publisher
