**Conference Proceedings, Green Building Challenge '98** Canada. Natural Resources Canada,1998 *LEED Practices, Certification, and Accreditation Handbook* Sam Kubba,2009-09-23 Adopted in the United States and a number of

other countries LEED certification is the recognized standard for measuring building sustainability Achieving LEED personal certification or project certification is the best way to demonstrate that the project is truly green Written by an architect with over 30 years of international experience this book provides architects designers building owners and construction engineers with an easy to understand guide to the nuts and bolts of LEED project and personal certification Written in plain and easy to understand language this hands on book is designed to assist readers with all aspects of LEED certification The handbook follows the rigorous third party commissioning process beginning with basic LEED concepts and then carefully explains LEED documentation and technical requirements along with its standards professional accreditation and codes The handbook provides readers with design strategies for sustainable site selection and design process for high performance building and commissioning Other important topics include green materials and products selection as well as strategies for ensuring Indoor Environmental Quality IEQ water efficiency and sanitary waste disposal This handbook also offers readers a multitude of forms with expert guidance for their completion Clear and authoritative in scope LEED Practices Certification and Accreditation Handbook provides architects builders owners construction managers and engineers with a reference that will help them to offer their clients peers and the public at large compelling proof that they have achieved their projects environmental goals and that the building is performing as designed Instruction for completing LEED checklist and forms Detailed explanation of the third party commissioning process Explains LEED documentation technical requirements Topics include green materials and products selection Sustainable Construction Supervisor Trainee Guide NCCER,2024-09-23 This new module was developed to instruct construction supervisors on sustainable construction management techniques especially as they relate to the construction phase LEED points targeted for their projects Key content includes coverage of project sustainability goals green building materials and technologies green building methods and processes and more A collaborative effort of the Green Building Certification Institute GBCI the Myers Lawson School of Construction at Virginia Tech the University of Florida and Subject Matter experts from the Top 100 Green Contractors in the United States this module covers a topic not addressed until now sustainable construction management for front line supervisors This module has been endorsed by GBCI and approved by USGBC for 20 general and LEEDspecific B D I D and O M continuing education hours for credential maintenance A related certification exam developed by NCCER and endorsed by GBCI will release in the second quarter of 2011 This module is published in full color and is competencybased An assessment is also forthcoming For more information contact NCCER Customer Service at 1 888 622 3720 Engineering News Record September 22 2008

**The Complete Guide to Green Building & Remodeling Your Home** Martha Maeda,2011 In today s economy and socially conscious environment regarding the environment many people cannot afford not to start considering ways they can build or remodel their home to ensure it is green With scientific sources such as the UN council on global warming making statements about the degradation of ice flow and environmental conditions by 2050 and the likelihood that crude oil sources

will be used up within the next fifty years it is especially necessary for young families to consider the implications of re-examining their homes and living situations to be more green. This book will guide you and your family through the process of learning more about and implementing the necessary changes and perspectives needed to change your home or build a new home that is environmentally conscious and prepared for the changing economic and environmental climate in the coming decades. You will learn why people have started to build green and how it can be done in today's regulatory and cost conditions quickly and inexpensively. You will learn how to remodel with green in mind and how to start working with building professionals that can provide the necessary materials, plans, and paperwork you need to proceed. You will learn which materials are best for green building by lifespan and how to choose between various green materials. You will learn how to not only use green materials but to make sure the construction process is green as well. You will learn the basics of framing your building, natural building methods, the energy systems you might use, and the heating/cooling options at your disposal. Construction and environmental experts have been interviewed, and their expertise is included in this book to help you learn everything you need to accomplish the above, as well as to know what kinds of water and waste systems are best, how to site, plan, and landscape your home, and what the most common myths about green building are. You will learn ten things you can do on any building project to keep it green, and any materials you should always have on hand for anything you do around the house. Regardless of whether you are just looking to remodel to make your house greener or are building a new home, this book will give you everything you need to stay green and respect the environment with your home.
