## **Vision And Violence:**

*Vision and Violence* Carl Yamamoto, 2012-05-11 This book offers the first in depth examination of the life and writings of Lama Zhang 1122-1193 key figure in the Tibetan renaissance. Controversial, larger than life, already revered as a literary innovator and tantric meditation master, Zhang entered public life in mid-career and forged a new model of rulership and religious community that would set the standard for later religious rulers of Lhasa, most notably the Dalai Lamas. The focus of the model was the tantric hermit who comes down from the mountains and sustains a worldly community through his mastery of space, time, and symbol. The subject is approached through a complex of related issues: lineage and tradition, formation, charisma, and hegemony; literary genre, textual economy, and the politics of tantra.

*Passionate Detachments* Amy Rust, 2017-05-24 Investigates the cultural value of film violence. *Passionate Detachments* investigates the rise of graphic violence in American films of the late 1960s and early 1970s and the popular aesthetics and critical responses. This violence inspired Amy Rust to examine four technologies adopted by commercial American cinema after the fall of the Hollywood Production Code: multiple camera, montage, squibs, small explosive devices, and artificial blood, freeze frames, and zooms. Approaching these technologies as figures, as opposed to mere tools, Rust traces the encounters they mediate between perception (what one sees, hears, and feels) and representation (how those sights, sounds, and feelings make meaning). These technologies, she argues, lend shape to film violence while organizing viewers on and off screen relationships to it. The result proves meaningful for an era self-consciously and perilously preoccupied with bloodshed. The post-Code period found Americans across the political spectrum demanding visual and increasingly violent demonstrations of presumably authentic realities. Corroborating fantasies of authenticity from military to counterculture, these technologies challenge them as well, pointing, however unwittingly, to the violently classed, gendered, and racialized blind spots such fantasies harbor. More broadly, the technologies answer concerns that films control violence too much or too little. Offering neither mere discourse nor mere thrills, they recover sense and sensation for all, not some, or even most, depictions of bloodshed. As figures, the devices also remediate vision and violence for film theory, which exhibits distrust for each in spite of the complexities phenomenology and psychoanalysis have brought to cinematic perception and pleasure.
