Cognition in the Real World Alastair D. Smith, 2023 The only textbook to frame cognitive psychology in the context of our everyday lives Our lives are governed by cognitive processes whether we are searching for a face in a crowd driving to work or learning a second language Cognition in the Real World brings together expert contributors who explain the processes underlying everyday behaviours It is set apart from traditional textbooks by being organised by behaviours we are exposed to every day such as drawing a picture learning your way around a new city or deciding how to invest your money Such activities naturally involve a variety of cognitive functions by considering these functions in an integrated way

the text provides a complete picture of how behaviours work together rather than separately Drawing upon important insights from areas such as developmental psychology and neuroscience Cognition in the Real World demonstrates how cognitive psychology fits with the broader subjects around it rather than treating it as an independent topic With a strong foundation in cognitive theory framed by an original and engaging real world approach the text makes the topics of cognition come alive
