Visions Of Technology:

Visions Of Technology Richard Rhodes,2012-09-18 Technology was the blessing and the bane of the twentieth century Human life span nearly doubled in the West but in no century were more human beings killed by new technologies of war Improvements in agriculture now feed increasing billions but pesticides and chemicals threaten to poison the earth Does technology improve us or diminish us Enslave us or make us free With this first ever collection of the essential twentieth century writings on technology Pulitzer Prize winning historian Richard Rhodes explores the optimism ambivalence and wrongheaded judgments with which Americans have faced an ever shifting world Visions of Technology collects writings on events from the Great Exposition of 1900 and the invention of the telegraph to the advent of genetic counseling and the defeat of Garry Kasparov by IBM s chess playing computer Deep Blue Its gems of opinion and history include Henry Ford on the horseless carriage Robert Caro on the transformation of New York City J Robert Oppenheimer on science and war Loretta Lynn on the Pill and much more Together they chronicle an unprecedented century of change *Visions of Technology*

Richard Rhodes,1999 **Engineers for Change** Matthew Wisnioski,2012-10-19 An account of conflicts within engineering in the 1960s that helped shape our dominant contemporary understanding of technological change as the driver of history In the late 1960s an eclectic group of engineers joined the antiwar and civil rights activists of the time in agitating for change The engineers were fighting to remake their profession challenging their fellow engineers to embrace a more humane vision of technology In *Engineers for Change* Matthew Wisnioski offers an account of this conflict within engineering linking it to deep seated assumptions about technology and American life The postwar period in America saw a near utopian belief in technology s beneficence Beginning in the mid 1960s however society influenced by the antitechnology writings of such thinkers as Jacques Ellul and Lewis Mumford began to view technology in a more negative light Engineers themselves were seen as conformist organization men propping up the military industrial complex A dissident minority of engineers offered critiques of their profession that appropriated concepts from technology s critics These dissidents were criticized in turn by conservatives who regarded them as countercultural Luddites And yet as Wisnioski shows the radical minority spurred the professional elite to promote a new understanding of technology as a rapidly accelerating force that our institutions are ill equipped to handle The negative consequences of technology spring from its very nature and not from engineering s failures Sociotechnologists were recruited to help society adjust to its technology Wisnioski argues that in responding to the challenges posed by critics within their profession engineers in the 1960s helped shape our dominant contemporary understanding of technological change as the driver of history *Future visions : education and technology.* ,1995

Pickover,1994-01-01 Clifford Pickover author of *Mazes for the Mind* has assembled a group of experts to examine how computers will change our lives in the near and not so near future Together the experts outline the fantastic potential for computers in our lives and show how the line between science and art in the computer age is often indistinct **Vision, Technology, and Subjectivity in Mexican Cyberpunk Literature** Stephen C. Tobin,2023-07-06 *Vision Technology and Subjectivity in Mexican Cyberpunk Literature* interrogates an array of cyberpunk and post cyberpunk science fiction novels and short stories from Mexico whose themes engage directly with visual technologies and the subjectivities they help produce all published during and influenced by the country's neoliberal era This book argues that television computers and smartphones and the literary narratives that treat them all correspond to separate yet overlapping scopic regimes within the country today Amidst the shifts occurring in the country's field of vision during this period the authors of these cyberpunk and post cyberpunk narratives imagine how these devices contribute to producing specular subjects or subjects who are constituted in large measure by their use and interaction with visual technologies In doing so they repeatedly recur to the posthuman figure of the cyborg in order to articulate these changes Stephen C Tobin therefore contends that the literary cyborg becomes a discursive site for working through the problematics of sight in Mexico during the globalized era In all these specular fictions represent an exceptional tendency within literary expression especially within the cyberpunk genre that grapples with themes and issues regarding the nature of vision being increasingly mediated by technology **International Library of Technology** ,1906 **Baking Technology** ,1924 Aviation Week & Space Technology ,1920 **New Technology at the Outset** Meinolf Dierkes,Ute Hoffmann,1992 Technology Monthly and Harvard Engineering Journal ,1916 Mineral Technology Series ,1927 **The Technology Monthly and Harvard Engineering Journal** ,1914
