

## Plant Bug

The bright colors of some plant bugs, such as this *Lopidea* from Arizona, send a warning to potential predators, and for at least some *Lopidea* species it is an honest warning about chemical defenses. Birds display an aversion to feeding on some *Lopidea* species, demonstrating the effectiveness of several compounds that exude from glands on the bug's thorax.

## Stink Bug

Stink bugs, so called because of their well-developed scent glands, or repugnatorial glands, are often conspicuous shield-shaped bugs. Many are brightly colored, presumably to warn potential predators that they taste awful. These colorful stink bugs (family Pentatomidae) from Costa Rica are a boldly spotted *Brochyslethrus rubromaculatus* (inset) and a pair of blue-green *Ecoso*.
