**Firepower** Paul Lockhart,2021-10-19 How military technology has transformed the world The history of warfare cannot be fully understood without considering the technology of killing In *Firepower* acclaimed historian Paul Lockhart tells the story of the evolution of weaponry and how it transformed not only the conduct of warfare but also the very structure of power in the West from the Renaissance to the dawn of the atomic era Across this period improvements in firepower shaped the evolving art of war For centuries weaponry had remained simple enough that any state could equip a respectable army That all changed around 1870 when the cost of investing in increasingly complicated technology soon meant that only a handful of great powers could afford to manufacture advanced weaponry while other countries fell behind Going beyond the battlefield *Firepower* ultimately reveals how changes in weapons technology reshaped human history

**Fifty Weapons that Changed the Course of History** Joel Levy,2014 A beautifully presented guide to 50 weapons and their historical impact on civilization *Fifty Weapons that Changed the Course of History* is a fascinating guide to the arms and armaments that have had the greatest impact on the development of human civilization Like the other titles in this series the book organizes the weapons into brief illustrated chapters Concise narratives describe the weapons the who where when why and how of their introduction and uses and explain their influence in one or more of four categories Social Political Tactical and Technological The stories span human history from our hunter gatherer ancestors who devised the spear and the wheel which brought about the war chariot to gunpowder which democratized warfare and has been the basis for almost every weapon used in war from that point on Entries include The longbow which led an outnumbered English army to a famous victory at the Battle of Agincourt in 1415 The Soviet T 34 the most effective and influential in terms of design tank to feature in World War II The Tomahawk cruise missile which

revolutionized tactics in modern warfare The Gatling Gun the first rapid repeating gun which turned the tide in the Americans favor during the Spanish American War The saga of human civilization has been formed and scarred by conflict Defining episodes of violence sometimes long and simmering at other times sudden and cataclysmic have produced new forms of weaponry Some of these have been decisive such as the terrifying war elephants deployed by Hannibal at the battle of Cannae in 216 B C Others have become iconic in our culture Chief among these is the easily copied AK 47 at first the symbol of communism and now of terrorism and the most widely found firearm in the world Some weapons have been definitive in their simplicity such as the bayonet in other cases such as the Tomahawk cruise missile the sheer complexity is dazzling Fifty Weapons That Changed the Course of History tells the story of the last 3 500 years through the arms and armaments that have shaped it This is the story of the weapons that formed our world and is sure to attract a wide readership
