System Modeling and Optimization XX E.W. Sachs, R. Tichatschke, 2013-03-14. *System Modeling and Optimization XX* deals with new developments in the areas of optimization, optimal control, and system modeling. The themes range across various areas of optimization: continuous and discrete, numerical and analytical, finite and infinite dimensional, deterministic and stochastic, static and dynamic theory and applications, foundations, and case studies. Besides some classical topics, modern areas are also presented in the contributions, including robust optimization, filter methods, optimization of power networks, data mining, and risk control. This volume contains invited and selected papers from presentations at the 20th IFIP TC7 Conference on System Modeling and Optimization, which took place at the University of Trier, Germany, from July 23 to 27, 2001, and which was sponsored by the International Federation for Information Processing (IFIP).

System Modeling and Optimization Adam Korytowski, Maciej Szymkat, Kazimierz Malanowski, Wojciech Mitkowski, 2009-10-27. This book constitutes a collection of extended versions of papers presented at the 23rd IFIP TC7 Conference on System Modeling and Optimization, which was held in Crowtham, Poland, on July 23-27, 2007. It contains 7 plenary and 22 contributed articles, the latter selected via a peer reviewing process. Most of the papers are concerned with optimization and optimal control. Some of them deal with practical issues, e.g., performance based design for seismic risk reduction or evolutionary optimization in structural engineering. Many contributions concern optimization of infinite dimensional systems, ranging from a general overview of the variational analysis through optimization and sensitivity analysis of PDE systems to optimal control of neutral systems. A significant group of papers is devoted to shape analysis and optimization. Sufficient optimality conditions for ODE problems and stochastic control methods applied to mathematical finance are also investigated. The remaining papers are on mathematical programming, modeling, and information technology. The conference was the 23rd event in the series of such meetings, biennially organized under the auspices of the Seventh Technical Committee, Systems Modeling and Optimization of the International Federation for
