**A Course in World Geography** Eric William Young, 1979 , **Nature of Geography as Perceived in Systems Theory** Sharma, B L, 1994 Geography is not what we have assumed it we have conceived it and we have perceived it but it is that what we have not imagined it it is around us It is a system in itself Because human behaviour becomes rational when it acts individually but it becomes rational when it operates upon in a collective form Therefore it is very difficult to understand man and his behaviour in a given situation So it is incredible to argue about the discipline its past history and the methodological contents It is a misconceived notion of set boundary and a goal of its own in a multidimensional facets of the changing world complexes in which we are living Geography in its manifestations begins with the land scape evolution Physical basis interacts with the phenomena culminating in human relationships Cultural land scape of conceptual world of real and abstract interactions and processes conditions and relations of multivariate facets of elements Geographers are thus drawn to the illusion with perplex mind of geographical images This perception has drawn geography and geographers both into a state of unending dilemma of academic jargon of puzzles i e Whether it is founded on systems theory or simply an irrelevant distraction Science provides us very sharp tools But any craftsman will tell you it is the sharp tool which can do most damage or harm when misapplied It is apparently observed that geographers are badly operationalised with their blunted tools The present attempt is thus to discuss all those problems arises due to multidimensional approaches of the past present analysis and future methodologies more particularly in the system analogy of systems theory General Systems and the General Systems Theory as all these notions have different connotations How geography as a discipline is fitted well in the analogy of systems theory has been the main concern to these volumes Let us explore the possibilities What Geography is The first volume deals with the Systems Theory and Geography whereas the second interprets the Possible World of Geographer in Systems Theory Contents Vol I Part I General Systems Chapter 1 General Systems Theory Chapter 2 General
