Michel de Montaigne 1877 is a collection of essays and letters by Michel de Montaigne Originally published in French as
Essais 1580 this edition was translated by English poet Charles Cotton in the late 17th century and republished by William
Carew Hazlitt the grandson of renowned English essayist and critic William Hazlitt No man living is more free from this
passion of sorrow than I who yet neither like it in myself nor admire it in others and yet generally the world as a settled thing
is pleased to grace it with a particular esteem clothing therewith wisdom virtue and conscience Foolish and sordid guise In
his masterful essays Michel de Montaigne eschews the typical distancing required of the authorial voice in order to
investigate public matters through a personal lens As the subject of his own musings he provides both a stirring self portrait
and an invaluable new voice that will resonate throughout Western literature Unlike the Enlightenment thinkers who would
follow in his footsteps Montaigne is skeptical of the possibility of human certainty and takes an ethical stand against the
European colonial project in the Americas and elsewhere At times serious at others tongue in cheek his wide ranging topics
include conscience politics sorrow solitude fear friendship war and poetry The Essays of Michel de Montaigne were written
at a crossroads in human history between Renaissance and Enlightenment Catholicism and Protestantism Montaigne argues
that to look outward requires we first look within and that the quest for happiness requires us to accept what we cannot
