Media Violence and Children Douglas A. Gentile, 2014-09-30 Stripping away the hype, this book describes how, when, and why media violence can influence children of different ages, giving parents and teachers the power to maximize the media's benefits and minimize its harm. There are many opinions about media violence and children, but not all are supported by science. In this book, the top experts gather the latest results from 50 years of scientific study as the basis for a comprehensive, in-depth examination of the complex issues surrounding the effects of media violence of different types. Each chapter focuses on a particular issue of concern, including hot topics such as brain development, cyber bullying, video games, and verbal aggression. Articles take into account factors such as economic differences based on the ages of children and differences between types of media violence. This book provides the information parents and those who work with families need to make the best choices. It includes chapters specifically relevant to the types of bullying schools have the most trouble identifying and controlling. Most importantly, the writing is both intelligent and accessible so that parents, educators, pediatricians, and policymakers can understand and apply the findings presented.

The Drama of Reality Television Danielle T. Ligoeki, 2018-08-14 In *The Drama of Reality Television: Lives of Youth in Liquid Modern Times*, the author offers a glimpse into the lives, viewing habits, and opinions of today's Generation Z. While reality television is often viewed as just a guilty pleasure, the conversations that the author had with young people show that reality television is a major pedagogical force in the lives of young viewers. This is compounded by our current liquid modern time period, a time in which everything is fluid, there are no solid bonds, and people are disposable. The author shares the incredible conversations that she had with seven honest, insightful pre-teenagers to give us a deeper understanding of the ways in which just a guilty pleasure is working to deeply impact the lives of young people.

The Praeger International

Collection on Addictions Angela Browne Miller, 2009 Communications , 1997 *Children and Society* Gerald Handel, Spencer Cahill, Frederick Elkin, 2007 *Children and Society* presents a comprehensive sociological portrayal of children and childhood from birth to the beginning of adolescence. A major theme is the tension between children's active agency and the socializing influences of the family, school, peer groups, and mass media. The book incorporates the most recent research and theories of childhood socialization. Its theoretical perspective is primarily symbolic interactionism, which emphasizes the development of the self. The volume features research that documents cultural variations within American society, shaped by social class, race, and ethnicity, and gender. *Children and Society* is organized into four parts, each with an introduction. Part I, *Understanding Childhood Socialization*, consists of four chapters. Chapter One reviews how social scientists have conceptualized children, leading to today's understanding of childhood as a social construction. Chapter Two briefly discusses the characteristics of the human organism that both require and make socialization possible, and the characteristics of society that receives the newborn. Chapter Three reveals the range of meaning of the concept of socialization in western and non-western societies and includes a review of the history of western childhoods. Chapter Four offers a careful exposition of the development of the self. Part II, *Agencies of Socialization*, focuses on the major agencies that help shape the development of the self in the United States and similar societies. One chapter each covers families, schools, peer groups, and mass media, respectively. *Diversities of Socialization* are the focus of Part III. Whereas Chapter Four presented a general account of how the self develops, the three chapters of Part III examine the variations that are shaped by social class, race, ethnicity, and neighborhood, and gender. The single chapter in Part IV, *Looking Back and Looking Ahead*, stresses that socialization is a life-long process. It briefly sketches issues of continuity and discontinuity in socialization throughout adolescence, adult life, old age, and death.

Youth Lifestyles in a Changing World Steven Miles, 2000 This work examines the changing nature of young people's lives at the start of a new century. Arguing that the sociology of youth has struggled to bridge the gap between structural and cultural conceptions of youth, this book emphasizes the notion of lifestyle as an enlightening means of

addressing young people's relationship with social change Against a social and cultural backdrop characterized by postmodern fragmentation risk and globalization young people are apparently finding individualized transitions into adulthood increasingly difficult and this book shows how lifestyles play an important role It considers key aspects of young people's lifestyles such as their relationship to rave the media and consumption in general as a means of constructing identities In this introduction to a complex field the author outlines the dilemmas faced by sociology and examines the role played by consumer lifestyles in constructing who and what young people are in a rapidly changing world
