Publisher's description How Students Write: A Linguistic Analysis Laura Louise Aull, 2020-04-01 Broad generalizations about people today are a familiar feature of first year student writing. How Students Write brings a fresh perspective to this perennial observation using corpus linguistics techniques. This study analyzes sentence level patterns in student writing to develop an understanding of how students present evidence, draw connections between ideas, relate to their readers, and ultimately learn to construct knowledge in their writing. Drawing on both first year and upper level student writing, the book examines the discourse of students at different points in their education. It also distinguishes between argumentative and analytic essays to explore the way school genres and assignments shape students' choices. In focusing on sentence level features such as hedges, perhaps, and boosters, definitely, this study shows how such rhetorical choices work together to open or close opportunities for thoughtful exchanges of ideas. Attention to these features can help instructors foster civil discourse, design effective assignments, and expose and question norms of higher education. **Words and Patterns** Katharine M.

Day, 1970 Mastering High-Frequency Words Joan Westley, 2024-12-31 The 180 Lessons in this sequential system of daily word work will help students develop fluency in reading and writing high frequency words. They will talk about the words, look for special features, use letters to build the words, and write them. Includes blackline masters to copy letters, word tiles, and header cards. Many teachers use word walls to display high frequency words; they are hoping their students will soon master them. The words are usually listed in alphabetical order for easy reference. Whenever students need to use one of these words in their writing, they can simply find its correct spelling on the word wall. Most teachers find this to be an effective way to remind students how these difficult words are spelled. However, word walls on their own are not sufficient to guide students to word mastery. To make word walls really work requires more than just putting the words up on the wall. The words need to be systematically introduced, taught, and reinforced over time. That is what Word Wall Work is all about.
