Social Science In Natural Resource Management Systems:

Social Science In Natural Resource Management Systems Marc L Miller, Richard P Gale, Perry J Brown, 2019-07-11 This book is about the conduct and contributions of applied social science It represents the beginning of a new intellectual tradition in applied social science and its purpose is to foster an exchange among the variety of social scientists who are concerned with natural resource policy

Environment, Society and Natural Resource Management Geoffrey Lawrence, Vaughan Higgins, Stewart Lockie, 2001 As greater significance is placed on the relationship between people and their environment it is increasingly acknowledged that few environmental problems can be solved without considering the social context in which they arise But what does it mean to incorporate the social and what types of social sciences are needed This incisive book critically reviews the theoretical perspectives that underlie social scientific contributions to natural resource management and argues for both a greater social science presence and for conceptual and methodological clarity within the social sciences themselves The expert contributors explore how new concepts and approaches can contribute positively to natural resource management They demonstrate how the social sciences can be used as a vehicle to highlight social concerns as well as to foster greater participation co operation and integration among community members natural resource managers and researchers Through detailed case studies from Australasia and the Americas the authors illustrate how different social science perspectives can be utilised The range and variety of views provide a basis for the evaluation of various and often competing disciplinary paradigms within the social sciences This book will undoubtedly contribute to a more sophisticated debate about the place of the social in environmental research It will prove to be of great worth to students and researchers of environmental and social issues to those involved in environmental decision making and community planning as well as environmental policymakers and natural resource managers
