Interviewing and Communication in Social Work Crispin P. Cross, 1974 Interviewing and communication are central to the work of the social worker the psychotherapist and many other specialists yet little attempt has been made to explore their interrelationship and complexity The clear interplay between the two is discussed in this book with special reference to social work Its publication should be particularly welcome at this time in view of the enormous progress that has been made in the professionalization of social work and in the application of communication techniques to an increasing number of different areas in modern society Dr Cross has drawn upon his wealth of experience in the fields of psychology sociology and social work in organizing and presenting this collection of papers all of which were specially written for this volume The book emphasizes the important role that communication plays in the interviewing process especially but not only in social work and shows that there are important sociological and psychological factors involved in that process that require far more attention than they have received in the past The first five chapters deal with these essentially theoretical issues the rest of the book is concerned with their practical application in social work These essays

should demonstrate to the social work student as well as to his more experienced colleague that interviewing and communication together provide the overall framework within which casework can be undertaken. Such a demonstration should also be of real value to students of sociology, personnel management and vocational guidance. It should also appeal to the general reader with an interest in the interviewing process in modern society.

Generalist Social Work Practice Elizabeth M. Timberlake, Michaela Zajicek Farber, Christine Anlauf Sabatino, 2008. This well known and widely used text is intended to provide entry level professional social workers with a foundation of knowledge and values needed to practice from a generalist perspective focusing on culturally competent, ethical, effective and accountable generalist social work practice skills. This thoroughly revised edition explores the strengths based problem solving approach in all phases of the General Method, moving away from a deficit perspective towards an asset resource perspective.

Foundations of Social Work Practice in the Field of Aging Roberta Rubin Greene, 2007. The aging of societies is a global phenomenon. In the United States alone, the life expectancy for both men and women will continue to increase over the next few decades and with that a population explosion of older adults. The dramatic increase in the number and diversity of older adults elevates the visibility of gerontological matters. As a result, social work practice is becoming more multigenerational, thereby demanding social workers regardless of their professional endeavors to be equipped with the most innovative theories and practices to serve older adults and their families. This comprehensive text spans the new knowledge and skills required in direct practice areas: group work and macro practice. It also outlines the Geriatric Social Work Competencies as developed by social work educators necessary to serve the older adult population and suggests how these competencies can be integrated into foundation curriculum. Social work educators, students, practitioners, administrators and policymakers will find updated, useful information in this text regarding assessment tools, cultural influences, evidence based practices, intervention techniques, theoretical examples. Individuals are living longer and healthier lives in part because of the extraordinary growth of biomedical knowledge and public health initiatives. The confluence of the rapid and large increase of the older population and the exponential increase in the dissemination of knowledge create an imperative for social workers to employ the most recent knowledge in their practice with people living increasingly long lives.
