## **Structuring International Economic Cooperation:**

**Structuring International Economic Cooperation** Gavin Boyd, 1991 This policy oriented volume serves also as an advanced text on international economic organizations and the politics of international trade It examines the ways in which political changes in major industrialized democracies are affecting their policy mixes their interactions with each other and the activities of international firms Gavin Boyd surveys the policy questions facing governments as a result of the increasing influence of those firms on national economic structures

**Migration Crises and the Structure of International Cooperation** Jeannette Money, Sarah P. Lockhart, 2019-01-15 Although international cooperation on migration is often promoted scholars have been unable to arrive at a consensus about the extent of cooperation in the current system Under what conditions does international cooperation on migration arise and what shape does it take These questions are important because migrants are often vulnerable to human rights abuses during their journeys as well as in the country of destination and international cooperation represents one mechanism for reducing this vulnerability Jeannette Money and Sarah P Lockhart ask these questions as they examine the patterns of migration flows during the post World War II period with particular attention to crises or shocks to the international system as in the case of migration following the recent conflicts in Afghanistan and Syria Their analysis makes several important contributions to this debate First they explain how the broad pattern of migration in the contemporary era generally from poorer less stable countries to wealthier more stable countries fosters cooperation that is predominantly bilateral when cooperation does in fact occur Second they argue that cooperation is unlikely under most circumstances because countries of destination prefer the current system which privileges their sovereignty over migration flows Finally they posit that cooperation may arise under three conditions when the costs of maintaining the status quo increase when countries of origin locate a venue where their numbers allow them to control the bargaining agenda or when migrant flows tend toward reciprocity
