Text And Contexts:

Texts and Contexts Steven Lynn, 1994 Gives students practical advice that not only shows them how to write about literature but also introduces them to the most exciting ideas about the meaning and methods in literary interpretation Explains and illustrates contemporary critical theories as they apply to a variety of literary texts These theories include reader response new criticism as well as biographical historical new historical psychological deconstruction and feminist criticism Texts and Contexts Adrian Beard, 2001 The idea of studying texts in context has become a new emphasis in literary studies This book explores the idea of contexts and the way they affect texts concentrating upon the writer's context the reader's context the text's context the language context and the meaning context **Text Or Context** Rüdiger Kunow, Stephan Mussil, 2013-03-06 Neuware This volume presents a discussion from various positions in literary and cultural studies about the relationship between textual and contextual readings of literature In understanding literary works do we rather map texts onto their contexts or contexts onto texts And what are the rules of projection By theoretical argument as well as exemplary cases Text or Context contributes to the current discussion between text oriented literary criticism and context biased cultural studies Text, Context and the Johannine Community David A. Lamb, 2014-04-24 Text Context and the Johannine Community adopts a new approach to the social context of the Johannine writings by drawing on modern sociolinguistic theory Sociolinguistics emphasizes language as a social phenomenon which can be analysed with reference not only to its broad context of culture but also through the use of register analysis to its narrower context of situation The Johannine writings have increasingly been seen as the product of a distinct Johannine Community depicted by some scholars as a sectarian group opposed both to wider Jewish society and to other Christian groups This model has largely been constructed on historical critical grounds yet given our lack of reliable external information about the origin of the Johannine writings a more fruitful approach may be to examine their lexico grammatical and discourse features to determine what these imply about interpersonal relationships This study compares selected narrative asides from the Gospel of John with a passage section from 1 John and with the two shorter Johannine Epistles It concludes that register analysis of these texts does not support the idea of a close knit sectarian group *Text, Context, Pretext* H. G. Widdowson, 2008-04-15 Written by a leading researcher in the field this fascinating examination of the relations between grammar text and discourse is designed to provoke critical discussion on key issues in discourse analysis which are not always clearly identified and examined Written by a leading researcher in the field Continues the enquiry into discourse analysis that Zellig Harris initiated 50 years ago which raised a number of problematic issues that have remained unresolved ever since Introduces the notion of pretext as an additional factor in the general interpretative process Focuses attention specifically on the work of critical discourse analysis CDA in light of the issues discussed **A Research Guide to Gothic Literature in English** Sherri L. Brown, Carol Senf, Ellen J. Stockstill, 2018-03-15 The Gothic began as a designation for barbarian tribes was associated with the cathedrals

of the High Middle Ages was used to describe a marginalized literature in the late eighteenth century and continues today in a variety of forms literature film graphic novel video games and other narrative and artistic forms Unlike other recent books in the field that focus on certain aspects of the Gothic this work directs researchers to seminal and significant resources on all of its aspects Annotations will help researchers determine what materials best suit their needs A Research Guide to Gothic Literature in English covers Gothic cultural artifacts such as literature film graphic novels and videogames This authoritative guide equips researchers with valuable recent information about noteworthy resources that they can use to study the Gothic effectively and thoroughly

Mary Shelley and the Rights of the Child Eileen Hunt Botting, Eileen M. Hunt, 2018 In *Mary Shelley and the Rights of the Child* Eileen Hunt Botting contends that *Frankenstein* is a profound work of speculative fiction designed to engage a radical moral and political question do children have rights

Sociolinguistics: Theoretical perspectives in sociolinguistics Nikolas Coupland, Adam Jaworski, 2009 This title is a new collection in Routledge's Critical Concepts in Linguistics series In six volumes it provides a critical synthesis of the key ideas findings methods and approaches that make up the interdisciplinary field of sociolinguistics It includes both classic texts and contemporary state of the art research with a bias towards the latter The editors aver that the collection will stand as an articulation of the New Sociolinguistics as it is emerging through a sustained reflexive reassessment of the field which is now ongoing set against a core of classic texts

Texts and Contexts Kenneth Quinn, 2024-08-30 First published in 1979 *Texts and Contexts* identifies those classics of Roman literature which deserve to survive because of their intrinsic quality and their lasting significance The most important of these texts are placed in the context of the tradition which each represents and which each group of texts taken together constitutes Four main streams of tradition are identified the poet as storyteller narrative poetry and drama the poet as teacher didactic poetry the poet as himself personal poetry and the poetry of social comment and Roman literary prose Each major text is presented in the form of one or more passages of substantial length for analysis in detail and comparison with related works The translations used include leading literary translations since the sixteenth century The result is a history of Roman literature in which the emphasis is laid on the quality of the text discussed rather than on comprehensiveness of treatment and on organic relationships rather than chronology This book is the result of thirty years of teaching experience by the author and his conviction that existing books on the same subject are inadequate and misleading It will be of particular interest to students taking classical literature and translation courses to students of English literature and anyone who is interested in literature even without a knowledge of Latin

Pre-text, Text, Context Robert L. Mitchell, 1980 The nineteenth century in France is a nightmare for literary historians Their thirst for categorization is more easily quenched by prior centuries to which because they seem unified by cohesive preoccupations and common goals such appellations as the Renaissance the Classical Age or le

grand siècle and the Enlightenment or Age of Ideas are appropriately applied For the protean nineteenth century for which no such handy tag has been or can be devised is beyond all else distinguished by extreme heterogeneity and eclecticism A period of chaotic social and political instability of scientific and industrial revolution it is in literature a time not of solidarity but of unprecedented individualism Collective social consciousness yields to isolated probings into the uncharted recesses of the human mind and soul and revolt against standardized even valorized literary practice is seen in such developments as the slow undermining of the accepted literary lexicon and of the qualities of unity clarity and reason and in a radical overhauling of the system of prosody If such diversity precludes coherence in nineteenth century French literature it can itself be recognized as the organizing element of this literary epoch And it is precisely this paradox that the essays in this volume intend to reflect They are not unified as orthodoxy might dictate by a common approach or theme or author Rather they are marked as was the century that is their context by divergence and variety not harmony and consistency Multiformity in theme is reflected in discussions of such varied topics as pygmalionism allegory mirage self consciousness plagiarism madness feminism the grotesque dance and alchemy which are addressed in turn from a variety of critical approaches thematic intertextual historical stylistic psychocritical sociological and semiotic Eclecticism indeed has shaped the basic conception of the collection Part 1 examines themes presented as pretext that inform either authorial motivation or the orientation of a text prior to its actual inscription Part 2 approaches the process of writing from the perspective of the text itself And Part 3 is concerned with those spatial temporal and linguistic elements context that surround the literary text

The Holy Bible According to the Authorized Version (A.D. 1611): Romans to Philomen Frederic Charles Cook, 1881

History, Theory, Text Elizabeth A. Clark, 2004-10-15 A historian of early Christianity considers various theoretical critiques to examine the problems and opportunities posed by the ways in which history is written Clark argues for a renewal of the study of premodern Western history through engagement with the critical methods that have transformed other humanities disciplines in recent decades

Reading Process and Practice Constance Weaver, 2002 Weaver incorporates especially timely information accurate data informed critique and results of often ignored research to help teachers counteract government and corporate intrusion into classrooms
