Total Confinement:

Total Confinement Lorna A. Rhodes, 2004-02-26 Ethnographically rich thick with gritty details and original insights Rhodes's revelatory book about US prisons those who are incarcerated in them and those who run them should be read by everyone who cares about social justice and the nature of power Emily Martin author of *Flexible Bodies* Thank you Lorna Rhodes for taking us to where the worst of the worst are kept out of sight and out of mind in the new millennium This powerful ethnography of the correctional high tech machine reveals how institutional power suffocates individual agency and redefines rationality and insanity Good bad and evil fall by the wayside Philippe Bourgois author of *In Search of Respect* Selling Crack in El Barrio A truly remarkable book The inside look at supermax confinement alone is worth the price of admission and the prose sometimes verges on poetry This is meticulous scholarship Hans Toch author of *Living in Prison*

The Ethics of Total Confinement Bruce A. Arrigo, Heather Y. Bersot, Brian G. Sellers, 2011-06-29 In three parts this volume in the AP LS series explores the phenomena of captivity and risk management guided and informed by the theory method and policy of psychological jurisprudence The authors present a controversial thesis that demonstrates how the forces of captivity and risk management are sustained by several interdependent conditions of control These conditions impose barriers to justice and set limits on citizenship for one and all Situated at the nexus of political social theory mental health law and jurisprudential ethics the book examines and critiques constructs such as offenders and victims self and society therapeutic and restorative health harm and community So too are three total confinement case law data sets on which this analysis is based The volume stands alone in its efforts to systematically diagnose the moral reasoning lodged within prevailing judicial opinions that sustain captivity and risk management practices impacting 1 the rights of juveniles found competent to stand criminal trial the mentally ill placed in long term disciplinary isolation and sex offenders subjected to civil detention and community re entry monitoring 2 the often unmet needs of victims and 3 the demands of an ordered society Carefully balancing sophisticated insights with concrete and cutting edge applications the book concludes with a series of provocative yet practical recommendations for future research and meaningful reform within institutional practice programming and policy *The Ethics of Total Confinement* is a thought provoking and timely must read for anyone interested in the ethical and legal issues regarding madness citizenship and social justice It has become clear that there is no criminological exit from embrace of degrading punishments and practices to which our increasingly distorted risk perception commits us Instead the path forward must run through a return to the ethical and psychological roots of security and justice *The Ethics of Total Confinement* is a quantum step forward in defining and advancing that path Jonathan Simon Adrian A. Kragen Professor of Law Jurisprudence and Social Policy Program UC Berkeley School of Law This book boldly calls for a total transformation in the way the law deals with people who are confined because of their perceived depravity or dangerousness It focuses on three outcast groups juveniles tried as adults people with mental illness subjected to hospitalization and sex

offenders committed as dangerous and based on an innovative analysis of the relevant caselaw and empirics shows why current practices not only visit substantial harm on these people but also brutalize those who deprive them of liberty and damage the rest of us by feeding our basest most uninformed fears Relying on Aristotelian philosophy therapeutic and restorative principles and commonsense justice the book persuasively argues that we must reorient the training and thinking of all major players in the system if our goal is to promote the maximum amount of human flourishing Christopher Slobogin Milton Underwood Professor of Law Vanderbilt University Law School *The Ethics of Total Confinement A Critique of Madness Citizenship and Social Justice* deepens our understanding of how our legal system justifies its treatment of those it confines By bridging gaps among relevant disciplines the book clarifies to an interdisciplinary audience just how inadequate those justifications turn out to be when measured by psychological ethical or justice based standards The book s provocative conclusions and recommendations offer much food for thought and suggest potential directions for action Dennis Fox Emeritus Associate Professor of Legal Studies and Psychology University of Illinois at Springfield *The Ethics of Total Confinement* shows how captivity diminishes the keepers and the kept It is a book that synthesises in creative new ways reformist visions of justice virtue and the cultivation of habits of character This is profound work that opens new paths to dignity healing and social justice John Braithwaite Australian Research Council Federation Fellow Australian National University *The Ethics of Total Confinement* offers a useful and wide ranging perspective grounded in psychological jurisprudence With its emphasis on the harm done to those most vulnerable to extremes of risk management this volume makes a welcome addition to the literature on confinement Lorna Rhodes Professor Department of Anthropology University of Washington *The provocative thesis of this book develops psychological jurisprudence to conceptualize the ethics of existing total confinement practices aspiring to greater justice and human flourishing for all A timely intervention of this kind is most welcome* George Pavlich Associate Vice President Research Professor of Law and Sociology University of Alberta **Swine 2000** ,2001 **Animal Health Insight** ,1990 **Regulatory Guide** U.S. Nuclear Regulatory Commission. Department of Charities and Corrections,1912 **Causal Analytics for Applied Risk Analysis** Louis Anthony Cox Jr.,Douglas A. Popken,Richard X. Sun,2018-06-19 Causal analytics methods can revolutionize the use of data to make effective decisions by revealing how different choices affect probabilities of various outcomes This book presents and illustrates models algorithms principles and software for deriving causal models from data and for using them to optimize decisions with uncertain outcomes It discusses how to describe and summarize situations detect changes evaluate effects of policies or interventions learn what works best under different conditions predict values of as yet unobserved quantities from available data and identify the most likely explanations for observed outcomes including

surprises and anomalies The book resents practical techniques for causal modeling and analytics that practitioners can apply to improve understanding of how choices affect probabilities of consequences and based on this understanding to recommend choices that are more likely to accomplish their intended objectives The book begins with a survey of modern analytics methods focusing mainly on techniques useful for decision risk and policy analysis Chapter 2 introduces free in browser software including the Causal Analytics Toolkit CAT software to enable readers to perform the analyses described and to apply modern analytics methods easily to their own data sets Chapters 3 through 11 show how to apply causal analytics and risk analytics to practical risk analysis challenges mainly related to public and occupational health risks from pathogens in food or from pollutants in air Chapters 12 through 15 turn to broader questions of how to improve risk management decision making by individuals groups organizations institutions and multi generation societies with different cultures and norms for cooperation These chapters examine organizational learning community resilience societal risk management and intergenerational collaboration and justice in managing risks
