

## **Composition Writing**

Composition can mean two things. It can mean a piece of writing, or it can mean the art and process of writing. Composition isn't a specific type of writing like an essay or a blog post. Instead, it's a broad term that can refer to any written work and how a piece is written. A composition is **not** the same as an essay. Here's one area where the definition of composition writing can be confusing—an essay is a kind of composition, but the terms aren't interchangeable. Every essay is a composition, but not every composition is an essay. A composition can also be a book report, a presentation or a research paper.

One of the best ways to take possession of knowledge is to write about what you have heard. At times you listen to a lecture and you think you already know what the writer is saying but by the time you attempt to write it out using your own words that is when you will discover that you do not know as much as you think you do. You might have been thinking that you know how to argue well only to discover when you start writing that you do not know how to put your points together. That is why it is important to practice writing different kinds of essays so that you can be proficient in almost all kinds of writing. Composition writing is also designed to test a candidate's ability to use English as an effective means of communication in specific situations. These types of compositions are designed to make you express yourself with clarity and coherence in a manner appropriate to the audience, purpose, topic and situation. You may come across situations in life when you may have to argue, describe, narrate an incidence or do some other things that require some skills in writing. When such situations occur, you are expected to be able to demonstrate your knowledge and skill by presenting what is logical, acceptable, convincing and understandable to the audience – readers.

Planning is a very important stage in composition writing. In some public exams, some students get disturbed when they see some other candidates scribbling away almost immediately they collect their paper. The confusion may be so much for some naive students such that they too start writing without planning or thinking much about what they want to write. In a public exam, you have to take a few minutes off to think about the topic, the points you are going to write about, how you will arrange your paragraphs, what your introduction will be and what your conclusion is likely to be.

### **Essay Writing Strategies**

#### **1. Note making**

Note taking is an important aspect of writing. Writing down the main points as it occurs to you while reading is important because it helps you to remember and organize the salient points in your work. When you have to analyze your topic, you need to write down the points as you hope to use them to develop the paragraphs as you write. You may even need to research a topic before you start writing and making notes as you read will help you when you need to acknowledge the source of your information although it is advised that you need to write in your own words as much as possible.

#### **2. Organizing your Work**

You should have an idea of how you want your work to be organized and you need to work towards this. If it is an argumentative essay, you should know the side you want to support. Even
