Benjamin Stein and John S. Reynolds. The book is packed with useful information and has been the architect's standard for fifty years. Electrical Engineering and Electronics, seventh edition. More up to date than ever, this reference classic provides valuable insights on the new imperatives for building design today. The Eighth Edition details the impact of computers, data processing, and telecommunications on building system design, the effects of new stringent energy codes on building systems, and computer calculation techniques as applied to daylighting and electric lighting design. As did earlier editions, the book provides the basic theory and design guidelines for both systems and equipment in everything from heating and cooling, water and waste, fire and fire protection systems, lighting, and electrical wiring, plumbing, elevators, and escalators, acoustics, and more. Thoroughly illustrated, the book is a basic primer on making comfort and resource efficiency integral to the design standard. 1991. 0 471 52502 2 1 664 pp. *Masonry Structural Design*. Richard E. Klingner, 2010-02-08. A Complete Guide to Masonry Materials and Structural Design. Innovations such as autoclaved aerated concrete masonry (AAC) are also discussed. Real-world case studies featuring a low-rise building with reinforced concrete masonry and a four-story building with clay masonry illustrate the techniques presented in this comprehensive resource. Coverage includes basic structural behavior and design of low-rise bearing wall buildings; materials used in masonry construction; code basis for structural design of masonry buildings including seismic design; introduction of MSJC treatment of structural design; strength design of reinforced and unreinforced masonry elements; allowable stress design of reinforced and unreinforced masonry elements; comparison of design by the allowable stress approach versus the strength approach; lateral load analysis of shear wall structure; design and detailing of floor and roof diaphragms. *Mechanics of Structures and Materials*. M.A. Bradford, R.Q. Bridge, S.J. Foster, 2026-02-02.
