Structure Argument:

A lexicalist account of argument structure Stefan Müller, 2018 There are two prominent schools in linguistics Minimalism Chomsky and Construction Grammar Goldberg Tomasello Minimalism comes with the claim that our linguistic capabilities consist of an abstract binary combinatorial operation Merge and a lexicon Most versions of Construction Grammar assume that language consists of flat phrasal schemata that contribute their own meaning and may license additional arguments This book examines a variant of Lexical Functional Grammar which is lexical in principle but was augmented by tools that allow for the description of phrasal constructions in the Construction Grammar sense These new tools include templates that can be used to model inheritance hierarchies and a resource driven semantics The resource driven semantics makes it possible to reach the effects that lexical rules had for example remapping of arguments by semantic means The semantic constraints can be evaluated in the syntactic component which is basically similar to the delayed execution of lexical rules So this is a new formalization that might be suitable to provide solutions to longstanding problems that are not available for other formalizations While the authors suggest a lexical treatment of many phenomena and only assume phrasal constructions for selected phenomena like benefactive and resultative constructions in English it can be shown that even these two constructions should not be treated phrasally in English and that the analysis would not extend to other languages as for instance German I show that the new formal tools do not really improve the situation and many of the basic conceptual problems remain Since this specific proposal fails for two constructions it follows that proposals in the same framework that assume phrasal analyses for all constructions are not appropriate either The conclusion is that lexical models are needed and this entails that the schemata that combine syntactic objects are rather abstract as in Categorical Grammar Minimalism HPSG and standard LFG On the other hand there are constructions that should be treated by very specific phrasal schemata as in Construction Grammar and LFG and HPSG So the conclusion is that both schools are right and wrong and that a combination of ideas from both camps is needed

Productivity in Argument Selection Amir Zeldes, 2012-12-06 This book centers on the idea that some verbs and other argument structure constructions have an inherently different propensity to realize lexically unfamiliar arguments independently of lexical semantic meaning This notion is explored both qualitatively using selected examples and quantitatively using large amounts of corpus data in both cases primarily from English and German

language system **Lexical Specification and Insertion** Peter Coopmans, Martin Everaert, Jane Barbara Grimshaw, 2000
The papers in this volume address the general question what type of lexical specifications we need in a generative grammar and by what principles this information is projected onto syntactic configurations or to put it differently how lexical insertion is executed Many of the contributions focus on what the syntactic consequences are of choices that are made with respect to the lexical specifications of heads The data in the volume are drawn from diverse languages among which Brazilian Portuguese Bulgarian Dutch English French German Icelandic Italian Mohawk Norwegian Polish Russian **Argument Structure and Linking** Stephen Wechsler, 1991 **Lexical-Functional Syntax** Joan Bresnan, Ash Asudeh, Ida Toivonen, Stephen Wechsler, 2015-06-18 Lexical Functional Syntax 2nd Edition the definitive text for Lexical Functional Grammar LFG with a focus on syntax is updated to reflect recent developments in the field Provides both an introduction to LFG and a synthesis of major theoretical developments in lexical functional syntax over the past few decades Includes in depth discussions of a large number of syntactic phenomena from typologically diverse languages Features extensive problem sets and solutions in each chapter to aid in self study Incorporates reader feedback from the 1st Edition to correct errors and enhance clarity *Argument Structure* Douglas N. Walton, 1996 Provides a systematic survey clarification and assessment of the different tests currently used to carry out tasks involved in argument identification and presents new methods for determining missing premises determining whether an argument is linked or convergent and deciding whether a given test of discourse contains an argument or not For courses in informal logic critical thinking argumentation and logical reasoning Also of interest to those in speech communication rhetoric discourse analysis and education Annotation copyrighted by Book News Inc Portland OR **Freedom, Recognition and Non-Domination** Fabian Schuppert, 2013-08-26 This book offers an original account of a distinctly republican theory of social and global justice The book starts by exploring the nature and value of Hegelian recognition theory It shows the importance of that theory for grounding a normative account of free and autonomous agency It is this normative account of free agency which provides the groundwork for a republican conception of social and global justice based on the core ideas of freedom as non domination and autonomy as non alienation As the author argues republicans should endorse a sufficientarian account of social justice which focuses on the nature of social relationships and their effects on people's ability to act freely and realize their fundamental interests On the global level the book argues for the cosmopolitan extension of the republican principles of non domination and non alienation within a multi level democratic system In so doing the book addresses a major gap in the existing literature presenting an original theory of justice which combines Hegelian recognition theory and republican ideas of freedom and applying this hybrid theory to the global domain Concrete Structures of the Midwest, Inc.
