Statehouse and Greenhouse Barry G. Rabe, 2004-02-17 No environmental issue triggers such feelings of hopelessness as global climate change Many areas of the world including regions of the United States have experienced a wide range of unusually dramatic weather events recently Much climate change analysis forecasts horrors of biblical proportions such as massive floods habitat loss species loss and epidemics related to warmer weather Such accounts of impending disaster have helped trigger extreme reactions wherein some observers simply dismiss global climate change as at the very worst a minor inconvenience requiring modest adaptation It is perhaps no surprise therefore that an American federal government known for institutional gridlock has accomplished virtually nothing in this area in the last decade Policy inertia is not the story of this book however *Statehouse and Greenhouse* examines the surprising evolution of state level government policies on global climate change Environmental policy analyst Barry Rabe details a diverse set of innovative cases offering detailed analysis of state level policies designed to combat global warming The book explains why state innovation in global climate change has been relatively vigorous and why it has drawn so little attention thus far Rabe draws larger potential lessons from this recent flurry of American experience *Statehouse and Greenhouse* helps to move debate over global climate change from bombast to the realm of what is politically and technically feasible

The Great Texas Wind Rush Kate Galbraith, Asher Price, 2013-07-01 From two environmental journalists the improbable story of how the oil and gas state became the nation's wind power leader *The Texas Observer* In the late 1990s West Texas was full of rundown towns and pumpjacks aging reminders of the oil rush of an earlier era Today the towns are thriving as 300 foot tall wind turbines tower above those pumpjacks Wind energy has become Texas's latest boom How did this dramatic transformation happen in a state that fights federal environmental policies at every turn In *The Great Texas Wind Rush* environmental reporters Kate Galbraith and Asher Price tell the compelling story of a group of unlikely dreamers and innovators politicians and profiteers The tale spans a generation and more and it begins with the early wind pioneers precocious idealists who saw opportunity after the 1970s oil crisis Operating in an economy accustomed to exploiting natural resources and always looking for the next big thing their ideas eventually led to surprising partnerships between entrepreneurs and environmentalists as everyone from Enron executives to T Boone Pickens as well as Ann Richards George W Bush and Rick Perry ended up backing the new technology In this down to earth account the authors explain the policies and science that propelled the windcatters to reap the great harvest of Texas wind They also explore what the future holds for this relentless resource that is changing the face of Texas energy Enjoyable to read I learned something on every page Michael Webber Associate Director Center for International Energy and Environmental Policy University of Texas at Austin A thoughtful valuable story for anyone who cares about renewable energy or climate change *The Associated Press* House documents, 1877 *Innovation Dynamics*

Women of Influence in Contemporary Music Michael K. Slayton, 2010-12-23 In *Women of Influence in Contemporary Music* Nine American Composers Michael K Slayton has collected essays which focus on women who have made significant contributions to American music Elizabeth Austin Susan Botti Gabriela Lena Frank Jennifer Higdon Libby Larsen Tania Le n Cindy McTee Marga Richter and Judith Shatin While these composers have much in common not least of all dedication to their art their individual stories reveal different impulses in American music Their works reflect the shifting societal landscapes in the United States over the last seven decades as well as different stylistic approaches to writing music Each chapter includes a biography of the composer an interview and a detailed analysis of one major composition The composers openly reflect on their individual journeys in which they have discovered respective musical languages and have found success during different times in history Because few music books focus solely on female composers *Women of Influence in Contemporary Music* offers a rare glimpse into the styles and attitudes of gifted women and their work

Wind Force ,2020-12-15 The story of Wind Force covers more than eight decades and brings to life in vivid detail A rural lifestyle lived early on without electricity that gave birth to a vision that transformed that same landscape The road that led one man who grew up in the heart of America's oil country and who trained as an accountant banker and entrepreneurial businessman to embrace the cause of green energy How standing up for the rights of small family farmers and ranchers enriched everyone involved The way that small communities far from any large cities banded together to help create an international force in wind energy and at the same time to sustain their homes and families while building a better future for themselves An engineering process that takes into account everything from Indian artifacts and endangered species to anchoring massive wind turbines that stand almost 300 feet tall and last for decades Why politicians and businessmen from as far away as China and Denmark are turning their attention to the wide open spaces of West Texas A hopeful outlook for America's environment and economy powered by resources that are inexhaustible One decade that saw an industry go from infancy to worldwide force generating billions of dollars in economic activity **Daily Bulletin of Weather Reports** ,1875
