Appropriating Technology Pierre Tchounikine, 2025-10-28 How we use digital technologies and make them our own Appropriation is the process by which we turn digital technologies into instruments for our own use Since we do not use technologies but rather our appropriations of them understanding why and how these appropriations develop is important and useful for both users and for designers However appropriation is an underexplored aspect of human computer interaction In Appropriating Technology Pierre Tchounikine explains that appropriation is constitutive of how we actually use things in practice and is different in nature from the initial process of learning to use a technology He provides an analysis of the phenomena at play and explains how the way we develop we evolve we learn is key how our human high level needs also play an important though often unconscious role how the current adaptation means offered by most technologies give us some degree of freedom to align technologies to our needs and desires although they are far from fully satisfactory and how these design aspects may be improved
