Perceptions of Spirituality and Spiritual Development in Education Held by Teachers and Students on Teacher Training Courses Martin Rawle, 2009 Current legislation requires schools in England and Wales to promote the spiritual development of their pupils The non statutory guidance provided by various bodies has resulted in broad and inclusive definitions of the spiritual and spiritual development which combines both the religious and the secular and applies to all areas of the curriculum and school life The world of academia has responded to this quasi official guidance with varying degrees of approval to downright hostility exposing the pretence that all agree with the current definitions and guidance This thesis examines by means of a cross sectional survey using qualitative and quantitative data gathered by means of questionnaire and interview the perceptions of a sample of student teachers 428 on teacher training courses and qualified teachers 76 of the meanings of spirituality spiritual experience and spiritual development Although different viewpoints emerge some underlying themes can be discerned Spirituality is conceived as the acquisition of a set of principles to guide everyday living which may be derived from a religion from a personal philosophy or from beliefs concerning morality relationships with others and an increased awareness of life and the world The spiritual development of pupils is seen to imply their freedom to search for and decide the principles they will adopt The views of respondents on the extent to which spiritual development should form part of the teacher s role are also reported and it is suggested that current terminology associated with spirituality be replaced with terms which students and teachers can more readily understand

**Primary School Assembly Perspectives and Practices** Diane C. Smart, 2001 Since 1988 the spiritual development of pupils has been a stated aim of the whole school curriculum By 1994 OFSTEDs report into religious education and collective worship had identified the failure of collective worship in primary schools more usually known as assembly to contribute satisfactorily to pupils spiritual development Using a case study approach this present research has sought to reveal ways in which teachers perspectives on the spiritual and their assembly practices might impact upon pupils spiritual development The current assembly practices at six Somerset schools were examined together with the perspectives that those taking the assemblies bring to that experience Data from observations and interviews was analysed in relation to those activities deemed conducive by the inspectorate to the promotion of spiritual development The same data was also analysed in relation to those factors which are seen to affect the selection of assembly elements and activities The

findings suggest that whilst assemblies may be perceived to contain many of the elements currently recommended for spiritual development factors relating to assembly organisation accommodation practices and content could nevertheless in some cases be impacting negatively on pupils spiritual development In addition not only is the concept of the spiritual variously understood by both teachers and inspectors but training for the development of pupils spiritually is not well established The research raises questions about the suitability of current assembly practices for developing pupils spiritually Furthermore it suggests that unless and until teachers and inspectors develop a more consistent understanding of the complex nature of spirituality and how pupils can best be developed spiritually based on present and future research and adequate training pupils spiritual development is unlikely to be well served by primary school assemblies

*Christian Faith, Formation and Education* Ros Stuart-Buttle, John Shortt, 2017-11-13 This book discusses the relationship between faith formation and education Rooted in a variety of discourses the book offers original insights into the education and formation of the human person both theoretical and practical Issues are considered within a context of contemporary tensions generated by an increasingly pluralist society with antipathy to religious faith and debated from interdenominational Christian perspectives Including chapters by an international team of experts the volume demonstrates how Christian faith holds significance for educational practice and human development It argues against the common assumption that there can be a neutral approach to education whilst at the same time advocating a critical dimension to faith education It brings fresh thinking about faith and formation which demands attention given the fast changing political educational and socio cultural forces of today It will appeal to students and researchers involved in Christian educational practice

**Spirituality in Education in a Global, Pluralised World** Marian de Souza, 2016-01-08 A particular problem associated with international research in the field of spirituality and education is the reluctance of scholars to agree on what spirituality means with numerous descriptions increasing ambiguity and reducing the impact of research in the discipline This book argues that it is important to understand spirituality as a unifying concept that has the potential to be meaningful in its application to the lives of children and young people in areas of learning and wellbeing Chapters show why and how spiritual learning should be addressed across the curriculum with implications for the design of learning programs and environments

**The spiritual development of students : a challenge for secular schools**, 2007 **Spiritual Development in UK Schools** Emily Sadowski, 2009 **Spirituality: Theory, Praxis and Pedagogy**, 2020-04-28 [The Spiritual Development of Elementary School Aged Children](#) Lloyd E. **Common Faith** Kevin Mott-Thornton, 2018-08-17 Published in 1998 this book provides a much needed philosophical analysis of the political and educational issues that are raised when spiritual development is regarded as a central

educational aim The author examines the meaning of spirituality in the educational context and provides a suitable educational characterization following a detailed critique of certain ideas put forward by John Dewey Alistair MacIntyre and Charles Taylor In the second part of the book the author examines various attempts to derive policies concerning the personal education of pupils from cultural and political claims The educational implications of a wide range of political perspectives are explored including those of liberalism communitarianism conservatism and pluralism Particular attention is given to the constraints imposed on educationalists by the liberalisms of John Rawls and Joseph Raz and in the final part the author questions whether any nationally common conception of spiritual education is either educationally adequate or politically acceptable
