David M. Levine, David F. Stephan, Timothy C. Krehbiel, Mark L. Berenson, 2010-02-08 **Solutions Manual for Statistics for Managers Using MS Excel**
Pin T. Ng, David M. Levine, 2010 *Practical and Clear Graduate Statistics in Excel - The Excel Statistical Master*
Mark Harmon, 2011-03-16 Complete and practical yet easy to understand graduate level statistics course with all of the problems worked out in Excel Thoroughly covers all topics of an intense graduate statistics course using nothing but step by step simple explanations Loaded with completed real world problems all in Excel this e manual is an outstanding supplement to a graduate statistics course Very clear explanations are used to show exactly how the Excel formulas integrate with the statistical frameworks being applied The reader will learn how to master and apply graduate level statistics much faster than a student in a normal graduate statistics course because this e manual s emphasis is entirely on problem solving not on useless forgettable theory that fills up many statistics courses This e manual achieves two goals teaching graduate level statistical frameworks in an easy to understand way and then showing how to implement all of it in Excel The widely used Microsoft Excel program provides a very simple but incredibly complete platform to perform heavy duty advanced statistical analysis All other statistical software packages such as Minitab SyStat and SPSS are expensive require lots of user training and expect that the user is an expert statistician right from the start Not this e manual nor Microsoft Excel The ability to perform graduate level statistics in Excel is an extremely useful and powerful tool for any graduate statistics student and business manager Homework assignments can be quickly checked with Excel Once difficult statistical business problems are now readily solvable in Excel The easy to follow frameworks in this e manual can be cleanly and swiftly duplicated in the real world and on statistics exams by hand without Excel right away The lessons are all in bite size chunks that are quickly absorbed for immediate use More than half of the lessons in this e manual are supplemented

with step by step videos for more convenient learning Some of the major topics covered in detail include regression ANOVA hypothesis tests confidence intervals combinations permutations correlation covariance t tests histograms and charting This e manual also contains two complete chapters with numerous videos showing exactly how to create user interactive graphs of the 10 major distributions in Excel These user interactive Excel graphs allow the user to vary the cells containing all of the distribution s parameters such as mean standard deviation and degrees of freedom and watch the graphed distribution instantly change right on the spreadsheet to conform to the new parameters This is an excellent and unique tool to fully grasp the functionality of the distributions discussed in this e manual All problem solving techniques are presented as step by step frameworks that can be readily applied to similar problems not as seemingly unrelated and difficult to apply statistical theorems like most statistics course do A number of problem solving techniques are presented in this e manual that do not appear in any other statistical text One example of a statistical technique presented only in this e manual and nowhere else is a detailed description showing how to solve every type of hypothesis test using the same four steps A number of widely used and complicated statistical tests such as the chi square independence test the chi square population variance test and conjoint analysis using dummy variable regression are described from top to bottom and also in Excel Graduate statistics students and business managers will find this e manual to be by far the easiest and fastest way to master graduate level statistics and to apply advanced statistics in Excel to solve difficult real world problems homework assignments and exam questions The reader of this e manual will quickly become an Excel Statistical Master
