State Markets And Development:

The State, Markets, and Development Amitava Krishna Dutt, Kwan S. Kim, Ajit Singh, 1994 Markets and the state are usually seen as opposed to each other as instruments of economic development This important new book attempts to go beyond the state market debate which it sees as largely the intellectual legacy of neoclassical economics and the related pendulum swings of opinion favouring one against the other Arguing that development can be hindered and fostered by both the state and markets the contributing authors suggest that the real challenge is not to choose between them but to find ways in which their virtues can be utilized jointly to further the goals of development The first part provides some general perspectives which critically analyse mainstream neoclassical views on states and markets while also providing some alternative approaches The contributors to the second part examine state market interaction in Latin America South Korea and India

States, Intergovernmental Relations, and Market Development Jinhua Cheng, 2018-05-17 This book is a theoretical and empirical analysis of institutional foundation of long term economic growth from the perspective of state market and central local relations The book argues that in order to safeguard sustainable market development it is necessary to centralize certain functions of the state to overcome local predatory governmental rulings and to decentralize others to increase local governmental market incentives simultaneously This institutional approach is conceptualized as Dual Intergovernmental Transformation for Market Development DITMD This book develops the DITMD model through an in depth empirical comparison on contemporary China and the 19th century United States

States Versus Markets Herman M. Schwartz, 1994 States versus Markets

focuses on the struggles of states as they deal with changing world markets and try to influence the international political economy in ways that serve their own interests Professor Schwartz argues that the stability and successful state intervention in markets that characterized the post World War II period were not normal but were in fact a dramatic departure from the typical processes of the global economy He points out that the current global economy increasingly resembles that of the nineteenth century when market pressures tended to overwhelm state policies Official Reports of the Debates of the House of Commons of the Dominion of Canada Canada.
