Artificial Neural Nets and Genetic Algorithms George D. Smith, Nigel C. Steele, Rudolf F. Albrecht, 2012-12-06 This is the third in a series of conferences devoted primarily to the theory and applications of artificial neural networks and genetic algorithms The first such event was held in Innsbruck Austria in April 1993 the second in Ales France in April 1995 We are pleased to host the 1997 event in the mediaeval city of Norwich England and to carry on the fine tradition set by its predecessors of providing a relaxed and stimulating environment for both established and emerging researchers working in these and other related fields This series of conferences is unique in recognising the relation between the two main themes of artificial neural networks and genetic algorithms each having its origin in a natural process fundamental to life on earth and each now well established as a paradigm fundamental to continuing technological development through the solution of complex industrial commercial and financial problems This is well illustrated in this volume by the numerous applications of both paradigms to new and challenging problems The third key theme of the series therefore is the integration of both technologies either through the use of the genetic algorithm to construct the most effective network architecture for the problem in hand or more recently the use of neural networks as approximate fitness functions for a genetic algorithm searching for good solutions in an incomplete solution space i.e. one for which the fitness is not easily established for every possible solution instance

John Dahl and Neo-Noir Paul Monaco, 2010-03-18 In John Dahl and Neo Noir Examining Auteurism and Genre Paul Monaco provides a focused inquiry into the first three feature films that director John Dahl made for theatrical release Kill Me Again 1989 Red Rock West 1993 and The Last Seduction 1994 Subsequent to their releases these three films became identified in academic film criticism as neo noir and Dahl was labeled a noir meister who made a

cottage industry of neo noir The importance of these three films and Monaco s investigation of them is how they illuminate a modern director s creative process in relation to an emerging genre Dahl is rightly recognized for his directorial vision and his creative style His approach to film direction and his distinctiveness of vision is thoroughly explored in the book Using interviews with the professionals with whom Dahl has worked closely Monaco also explores basic notions about auteurism and how genre is defined Considering Dahl s extensive directing for television alongside his first three films John Dahl and Neo Noir ultimately demonstrates how this groundbreaking director is a prime example of a modern director for hire
