The First Transcontinental Railroad James K. Wheaton, 2011 The First Transcontinental Railroad originally called the Pacific Railroad was a railroad built in the United States between 1863 and 1869 that connected the western part of America with its eastern part Built by the Central Pacific Railroad of California and the Union Pacific Railroad it connected the Eastern terminus of Council Bluffs Iowa Omaha Nebraska with the railroad lines of the Pacific Ocean at Oakland California In time it would link in with the existing railway network present on the Eastern Coast of America thus connecting the Atlantic and Pacific coast of the United States for the first time by rail Because of this the line received a second nickname the Overland Route The railroad was a government operation authorized by Congress during the height of the Civil War Congress passed the Pacific Railroad Acts in 1862 and again in 1864 To pay for it the US government issued 30 year bonds as well as granting government land to contractors The construction of the line was a major achievement by both the Union Pacific constructing westward from Iowa and the Central Pacific constructing eastward from California The line was officially opened on May 10 1869 with the Last Spike driven through the railway at Promontory Summit Utah James K Wheaton looks at the history in this eBook

Republican Custer's on the Washita or Crook's in the Sierra Madre The construction of the Union Pacific Railroad was of greater importance to the people of the United States than the inauguration of steamship service across the Atlantic or the laying of the Atlantic Telegraph Yet the one has been heralded from time to time and the other allowed to sink into temporary obscurity To make good Americans of the coming generation all that is necessary is to make them proud of American achievements and the West was and is a field full of such The building of the Pacific Railroad was one of the great works of man Its promoters were men of small means and little or no financial backing outside of the aid granted them by the Government It took nerve and good Yankee grit to undertake and carry out the project How it was done it is hoped the succeeding pages may show Fair Oaks California 1906 TABLE OF CONTENTS The Project and its Projectors The Proposition in Congress Mostly Financial Commencement of the Work Progress Made Indian Troubles during Construction The Builders Completion of the Line The Kansas Division Kansas Pacific Ry The Denver Cheyenne Line Denver Pacific R R History of the Line since its Completion The Central Pacific Railroad Appendix Roster of Officials Statistics Nomenclature **Dot, Dot, Dot, Done! the Building of the First Transcontinental Railroad** History West, Southern Pacific Company, 1981 *A Great and Shining Road* John Hoyt Williams, 1996-01-01 The Union Pacific and Central Pacific Railroads were officially joined on May 10 1869 at Promontory Point Utah with the driving of a golden spike This historic ceremony marked the completion of the first transcontinental railroad Spanning the Sierras and the Great American Desert the tracks connected San Francisco to Council Bluffs Iowa A Great and Shining Road is the exciting story of a mammoth feat that called forth entrepreneurial daring financial wizardry technological innovation political courage and chicanery and the heroism of thousands of laborers

The Transcontinental Railroad Therese Harasymiw, 2017-07-15 Readers may know the basic facts about the creation of the first transcontinental railroad but the full story behind the push to connect the United States by rail is much more than the names and dates taught in history classes Readers discover the exciting important details including the contributions of immigrants as they encounter engaging main text comprehensive sidebars and historical images that include carefully chosen primary sources These text features come together to give readers an in depth look at the first successful attempt to connect the United States through transportation **The Transcontinental Railroad** Charles River Editors, 2017-03-25 Includes pictures Includes accounts written by newspapers railroad workers and executives Includes a bibliography for further reading Includes a table of contents The necessity that now exists for constructing lines of railroad and telegraphic communication between the Atlantic and Pacific coasts of this continent is no longer a question for argument it is conceded by every one In order to maintain our present position on the Pacific we must have some more speedy and direct means of intercourse than is at present afforded by the route through the possessions of a foreign power 1856 report made by the Select Committee on the Pacific Railroad and Telegraph of the U S House of Representatives The Transcontinental Railroad laid across the United States during the 1860s remains the very epitome of contradiction On the one hand it was a triumph of

engineering skills over thousands of miles of rough terrain but on the other hand it drained the natural resources in those places nearly dry It civilized the American West by making it easier for women and children to travel there but it dispossessed Native American civilizations that had lived there for generations It made the careers of many men and destroyed the lives from many others It was bold and careless ingenious and cruel gentle and violent and it enriched some and bankrupted others In short it was the best and worst of 19th century America in action As settlers pushed west and the Gold Rush brought an influx of Americans to California the need for something like the Transcontinental Railroad was apparent to the government in the 1850s and with the help of private companies government officials conducted all kinds of land surveys in order to plot a course Of course even once a route was chosen the backbreaking work itself had to be done to connect railroad lines across the span of nearly 2 000 miles This required an incredible amount of manpower often consisting of unskilled laborers engaging in dangerous work and the financial resources poured into it were also extreme J O Wilder a Central Pacific Southern Pacific employee described a typical scene The Chinese were as steady hard working a set of men as could be found With the exception of a few whites at the west end of Tunnel No 6 the laboring force was entirely composed of Chinamen with white foremen and a boss translator A single foreman often Irish with a gang of 30 to 40 Chinese men generally constituted the force at work at each end of a tunnel of these 12 to 15 men worked on the heading and the rest on the bottom removing blasted material When a gang was small or the men were needed elsewhere the bottoms were worked with fewer men or stopped so as to keep the headings going Ultimately the project was considered so important that work on it progressed throughout the Civil War and it took the better part of the 1860s before it was finally completed Once the railroad was in place it proved a boon to building up the American West especially the Southwest and Pacific Northwest in places like Nevada Utah Wyoming Colorado Oregon and Washington The Transcontinental Railroad chronicles the construction of the railroad that connected America s coasts Along with pictures of important people places and events you will learn about the Transcontinental Railroad like never before in no time at all **Let's Go to Build the First**
