

POLITICAL DEVELOPMENTS

In the early 1950s, there were several purges within the CCP, which targeted perceived enemies of the state and resulted in the imprisonment, torture and execution of thousands of people.

In 1956, Mao launched the 'Hundred Flowers Campaign', which encouraged intellectuals and other critics to speak out and offer constructive criticism of the government. However, this campaign was quickly followed by the Anti-Rightist Campaign, which targeted those who had criticised the government and resulted in the persecution of thousands of people.

In 1959, Mao resigned as the Chairman of the PRC and was replaced by Liu Shaoqi. However, Mao remained the de facto leader of the country and continued to influence policy.

FOREIGN AFFAIRS

- During the Korean War, the PRC supported North Korea against the United States and its allies. However, in the late 1950s and early 1960s, the relationship between the PRC and the Soviet Union began to deteriorate. Mao criticized the Soviet leadership and promoted his own version of communism, known as Maoism. This led to the Sino-Soviet split and the breakdown of relations between Khrushchev and Mao.

Transformation Of Socialism:

The Transformation of State Socialism D. Lane, 2007-09-12 This book considers aspects of transformation of former state socialist countries social and economic outcomes forces in the transformation process problems of consolidation of the new regimes and other scenarios It also looks at alternative types of society that might replace state socialism particularly state capitalism and market socialism

The Capitalist Transformation of State Socialism David Lane, 2013-11-20 David Lane outlines succinctly yet comprehensively the development and transformation of state socialism While focussing on Russia and the countries of Eastern Europe he also engages in a discussion of the Chinese path In response to the changing social structure and external demands he outlines different scenarios of reform He contends that European state socialism did not collapse but was consciously dismantled He brings out the West's decisive support of the reform process and Gorbachev's significant role in tipping the balance of political forces in favour of an emergent ascendant class In the post socialist period he details developments in the economy and politics He distinguishes different political and economic trajectories of countries of the former USSR the New Member States of the European Union and China and he notes the attempts to promote further change through coloured revolutions The book provides a detailed account not only of the unequal impact of transformation on social inequality which has given rise to a privileged business and political class but also how far the changes have fulfilled the promise of democracy promotion wealth creation and human development Finally in the context of globalisation the author considers possible future political and economic developments for Russia and China Throughout the author a leading expert in the field brings to bear his deep knowledge of socialist countries draws on his research on the former Soviet Union and visits to nearly all the former state socialist countries including China

Socialism, Capitalism, Transformation Leszek Balcerowicz, 1995 Professor Balcerowicz is highly regarded in both policy making and academic circles Most of the essays are based on his first hand experience in stabilizing the Polish economy at an early stage of hyperinflation and transforming it into a competitive capitalist market economy This volume gathers together a collection of essays integrated by two central themes the comparative economic performance of different economic systems centralized socialism reformed socialism competitive socialism and the transition from socialism to capitalism under newly established pluralistic political systems in Central and Eastern Europe

The Transformation of Socialism Melvin Gurtov, 2019-09-13 This book is based on Conference on the Transformation of Socialism in the Soviet Union and China and reveals a second feature of the conference the candor of the presentations It discusses the effects of the reforms on political

processes and the development of socialism **Elites and Classes in the Transformation of State Socialism** David S. Lane, 2012-09-25 The year 2011 marks the twentieth anniversary of the end of the Soviet Union This may be an appropriate time to evaluate the adoption by previously state socialist societies of other economic and political models The transition has sometimes been described in positive terms as a movement to free societies with open markets and democratic elections Others have argued that the transition has created weak poverty stricken states with undeveloped civil societies ruled by unresponsive political elites Which is the more accurate assessment David Lane examines a few of the theoretical approaches that help explain the trajectory of change from socialism to capitalism He focuses on two main approaches in this volume elite theories and social class Theories dwelling on the role of elites regard the transformation from socialism to capitalism as a type of system transfer in which elites craft democratic and market institutions into the space left by state socialism Lane contrasts this interpretation with class based theories which consider transformation in terms of revolution and explain why such theories have not been considered the best way of framing the transition in the post socialist states While recognizing that elites can play important roles and have the capacity to transform societies Lane contends that elite theories alone are inadequate to explain a system change that brings free markets In contrast he proposes a class approach in which two groups characterize state socialism an administrative class and an acquisition class **The Transformation Of**

Communist Systems Bernard Chavance, Charles Hauss, Mark Selden, 2019-06-26 In the confrontation between the two main economic systems that has marked the twentieth century capitalism has been declared the winner by default over its adversary socialism Today establishing a market economy has become the primary goal of the formerly socialist countries The history of economic reform helps explain this remarkable turning point Attempts to improve the old centralized system by expanding enterprise autonomy in Poland the Soviet Union and East Germany and more radical reforms that limited the role of central planning in Yugoslavia Czechoslovakia Hungary and China encountered social and political obstacles or had unexpected and undesired effects During the 1980s the idea of a socialist market economy which had been seen as a third way between capitalism and centralized socialism was abandoned as economists gradually came to support a free market rather than the dogma of planning Through a comparative and historical analysis of change in socialist and post socialist systems this timely and original book clarifies the policies and pitfalls in this extraordinary transition Bernard Chavance provides a succinct introduction and analysis of the politics and economics of Eastern Europe from the creation of the Stalinist system in the Soviet Union through what he argues have been three major waves of reform since the 1950s to the dismantling of most socialist governments in the 1990s Exploring the link between the one party regime and the growing rigidity of socialist economic systems the author analyzes the failure of both incremental and radical reforms to adapt to new economic challenges thus leading to the ultimate collapse of communist regimes in Europe **The Polish Road from**

Socialism: The Economics, Sociology and Politics of Transition Walter D. Connor, Piotr Ploszajski, 2019-07-26 What the

contributors to this volume offer is neither a romantic version of the course of Polish history nor a jubilant account of the recovery of national independence and political choice. Rather they offer a variety of tough minded analytic perspectives on what comes when the party is over not just the PSPR but the celebration marking its downfall. They focus on Poland's movement toward an internationally competitive market economy a political democracy in which plural interests compete and the constitution of a civil society that both tolerates and ameliorates conflict. The multidisciplinary contributors include Jan Mujzel Keith Crane Benjamin Slay Kazimierz Poznanski Jan Bossak Wojciech Bienkowski Włodzimierz Wesolowski Edmund Wnuk Lipinski Adam Sarapata Andrzej Sicinski Piotr Lukaszewicz Krzysztof Nowak David S.
