Translating Cultures David Katan,2014-06-03 As the 21st century gets into stride so does the call for a discipline combining culture and translation This second edition of Translating Cultures retains its original aim of putting some rigour and coherence into these fashionable words and lays the foundation for such a discipline This edition has not only been thoroughly revised but it has also been expanded In particular a new chapter has been added which focuses specifically on training translators for translational and intercultural competencies The core of the book provides a model for teaching culture to translators interpreters and other mediators It introduces the reader to current understanding about culture and aims to raise awareness of the fundamental role of culture in constructing perceiving and translating reality Culture is perceived throughout as a system for orienting experience and a basic presupposition is that the organization of experience is not reality but rather a simplified model and a distortion which varies from culture to culture Each culture acts as a frame within which external signs or reality are interpreted The approach is interdisciplinary taking ideas from contemporary translation theory anthropology Bateson s logical typing and metamessage theories Bandler and Grinder s NLP meta model theory and Hallidayan functional grammar Authentic texts and translations are offered to illustrate the various strategies that a cultural mediator can adopt in order to make the different cultural frames he or she is mediating between more explicit

Translating Cultures Abraham Rosman, Paula G. Rubel, 2020-06-15 The task of the anthropologist is to take ideas concepts and beliefs from one culture and translate them into first another language and then into the language of anthropology This process is both fascinating and complex Not only does it raise questions about the limitations of language but it also challenges the ability of the anthropologist to communicate culture accurately In recent years postmodern theories have tended to call into question the legitimacy of translation altogether This book acknowledges the problems involved but shows definitively that translating cultures can successfully be achieved The way we talk write read and interpret are all part of a translation process Many of us are not aware of translation in our everyday lives but for those living outside their native culture surrounded by cultural difference the ability to translate experiences and thoughts becomes a major issue Drawing on case studies and theories from a wide range of disciplines including anthropology philosophy linguistics art history folk theory and religious studies this book systematically interrogates the meaning complexities and importance of translation in anthropology and answers a wide range of provocative questions such as Can we unravel the true meaning of the Christian doctrine of trinity when there have been so many translations What impact do colonial and postcolonial power structures have on our understanding of other cultures How can we use art as a means of transgressing the limitations of linguistic translation *Translating Cultures Perspectives on Translation and Anthropology* is the first book fully to address translation in anthropology It combines textual and ethnographic analysis to produce a benchmark publication that will be of great importance to anthropologists philosophers linguists historians and cultural theorists alike

Translating Culture Specific References on Television Irene Ranzato, 2015-09-16 *Translating Culture Specific References on Television* provides a model for investigating the problems posed by culture specific references in translation drawing on case studies that explore the translational norms of contemporary Italian dubbing practices This monograph makes a distinctive contribution to the study of audiovisual translation and culture specific references in its focus on dubbing as opposed to subtitling and on contemporary television series rather than cinema Irene Ranzato's research involves detailed analysis of three TV series dubbed into Italian drawing on a corpus of 95 hours that includes nearly 3 000 CSR translations Ranzato proposes a new taxonomy of strategies for the translation of CSRs and explores the sociocultural pragmatic and ideological implications of audiovisual translation for the small screen

Virgil and his Translators Susanna Braund, Zara Martirosova Torlone, 2018-10-04 This is the first volume to offer a critical overview of the long and complicated history of translations of Virgil from the early modern period to the present day transcending traditional studies of single translations or particular national traditions in isolation to offer an insightful comparative perspective The twenty nine essays in the collection cover numerous European languages from English French and German to Greek Irish Italian Norwegian Slovenian and Spanish but also look well beyond Europe to include discussion of Brazilian Chinese Esperanto Russian and Turkish translations of Virgil While the opening two contributions lay down a broad theoretical and comparative framework the majority conduct comparisons within a particular language and combine detailed case studies with in depth contextualization and theoretical background showing how the translations discussed are embedded in their own cultures and historical moments The final two essays are written from the perspective of contemporary translators closing out the volume with a profound assessment not only of the influence exerted by the major Roman poet on later literature but also why translation of a canonical author such as Virgil matters not only as a national and transnational cultural phenomenon but as a personal engagement with a literature of enduring power and relevance

Bridging Cultures Ciara, 2014-04-15 With the rapidly developing globalization of various sectors of modern life individuals organizations and nations are becoming increasingly aware of the ways in which cultural diversity may not only be a potential cause of conflict but also a source of growth creativity and inspiration If traditionally intercultural mediation has been understood as a conflict solving strategy or as a means to facilitate communication between individuals from different cultural backgrounds Bridging Culture aims at providing a framework and a set of theoretical reflections towards a larger vision of the field presenting mediation as a particular form of critical intervention within the different domains of the humanities The contributions in the present volume take intercultural mediation to be a multifaceted interdisciplinary phenomenon impacting upon the fields of linguistics and literature as well as translation and cultural studies where themes such as interculturality multilingualism and cultural transfer are continual and urgent features of contemporary discourse and debate
