Interdisciplinarity, Multidisciplinarity and Transdisciplinarity in Humanities Eugene Steele, 2016-02-29 The domination of single subjects in academic programmes and institutions has recently been called into question Literary studies are currently opening themselves up to the epistemological renewal that other fields can offer They are increasingly borrowing theoretical tools from other subjects in order to analyse the historical

socio political and institutional conditions of the production of literary texts to identify the general discursive circumstances in which they emerge and to study the relationship between literature and other media Similarly while subjects such as sociology history and political science have always been closely related if not literally spinoffs from one another as in the case of sociology vis vis anthropology what becomes of their specificities when they borrow from geography to address space related issues from psychology to understand social actors individual motivations or from literary studies to make sense of individual or collective narratives The present volume accounts for experiments in research that overstep disciplinary boundaries by analysing the new fields and methodologies emerging in the contemporary globalised academic environment which puts a strong premium on synergism and linkages Moreover it assesses current theoretical reflections on inter multi and transdisciplinarity as well as research grounded in it and measures their impact on the evolution of scholarship and curriculum in the fields of literature language and humanities
