Museums in a Digital Age Ross Parry, 2013-01-11 The influence of digital media on the cultural heritage sector has been pervasive and profound Today museums are reliant on new technology to manage their collections They collect digital as well as material things New media is embedded within their exhibition spaces And their activity online is as important as their physical presence on site However digital heritage as an area of practice and as a subject of study does not exist in one single place Its evidence base is complex diverse and distributed and its content is available through multiple channels on varied media in myriad locations and different genres of writing It is this diaspora of material and practice that this Reader is intended to address With over forty chapters by some fifty authors and co authors from around the world spanning over twenty years of museum practice and research this volume acts as an aggregator drawing selectively from a notoriously distributed network of content Divided into seven parts on information space access interpretation objects production and futures the book presents a series of cross sections through the body of digital heritage literature each revealing how a different aspect of curatorship and museum provision has been informed shaped or challenged by computing Museums in a Digital Age is a provocative and inspiring guide for any student or practitioner of digital heritage

Hewlett, 2016-10-22 This is the first book to examine social learning and innovation in hunter gatherers from around the world More is known about social learning in chimpanzees and nonhuman primates than is known about social learning in hunter gatherers a way of life that characterized most of human history The book describes diverse patterns of learning and teaching behaviors in contemporary hunter gatherers from the perspectives of cultural anthropology ecological anthropology biological anthropology and developmental psychology The book addresses several theoretical issues including the learning hypothesis which suggests that the fate of Homo sapiens and Neanderthals in the last glacial period might have been due to the differences in learning ability It has been unequivocally claimed that social learning is intrinsically important for human beings however the characteristics of human learning remain under a dense fog despite innumerable studies with children from urban industrial cultures Controversy continues on problems such as do hunter gatherers teach If so what types of teaching occur who does it how often under what contexts and so on The book explores the most basic and intrinsic aspects of social learning as well as the foundation of innovative activities in everyday activities of contemporary hunter gatherer

people across the earth The book examines how hunter gatherer core values such as gender and age egalitarianism and extensive sharing of food and childcare are transmitted and acquired by children Chapters are grouped into five sections 1 theoretical perspectives of learning in hunter gatherers 2 modes and processes of social learning in hunter gatherers 3 innovation and cumulative culture 4 play and other cultural contexts of social learning and innovation 5 biological contexts of learning and innovation Ideas and concepts based on the data gathered through an intensive fieldwork by the authors will give much insight into the mechanisms and meanings of learning and education in modern humans *Fundamentals of Sociology* Edwin Asbury Kirkpatrick,1916 *An Introduction to Sociology* Ernest Rutherford Groves,1928 **Modern Scientific Knowledge of Nature, Man, and Society** Frederick Albert Cleveland,1929 **Circular** United States.
