Travel Geography:

Travel, Geography, and Empire in Latin Poetry Micah Young Myers, Erika Zimmermann Damer, 2021-09-29 This volume considers representations of space and movement in sources ranging from Roman comedy to late antique verse exploring how poetry in the Roman world is fundamentally shaped by its relationship to travel within the geography of Rome's far-reaching empire. The volume surveys Roman poetics of travel and geography in sources ranging from Plautus to Augustan poetry from the Flavians to Ausonius. The chapters offer a range of approaches to the complex relationship between Latin poetry, Roman identity, imperialism, and travel, and geospatial narratives and the diachronic and generic evolutions of poetic descriptions of space and mobility. In addition, two chapters including the concluding one contextualize and respond to the volume's discussion of poetry by looking at ways in which Romans not only write and read poems about travel and geography but also make writing and reading part of the experience of traveling, as demonstrated in their epigraphic practices. The collection as a whole offers important insights into Roman poetics and into ancient notions of movement and geographical space. *Travel, Geography, and Empire in Latin Poetry* will be of interest to specialists in Latin poetry, ancient travel, and Latin epigraphy, as well as to those studying travel, writing, geography, imperialism, and mobility in other periods. The chapters are written to be accessible to researchers, graduate students, and advanced undergraduates.

The Business of Tourism A. K. Bhatia, 2007-09 Travel and tourism is one of the world's most important and fastest growing economic sectors, generating jobs and substantial wealth for economies around the globe. The present book, *The Business of Tourism: Concepts and Strategies*, explains the complex tourism phenomenon in its various manifestations. Various academic disciplines are involved in the study of tourism because of the complex nature of the subject. Some basic disciplines such as economics, psychology, sociology, and geography contribute a great deal to the understanding of the subject. Newer disciplines like marketing and management, special interest tourism, travel legislation, and business travel have been introduced in this volume. The book gives the reader a global perspective of the travel and tourism industry. The approach has been to provide a simple and comprehensive outline of as many concepts as possible. The book contains some additional features which will be of great help to the reader. These features include case studies, having references to the subject matter discussed in various chapters. The cases are taken from the industry and provide interesting material for interactive discussion.
