Statistics in Language Studies Anthony Woods, 2000      *Statistics in Language Research* Toni Rietveld, Roeland van Hout, 2010-12-14 Statistics in Language Research gives a non technical but more or less complete treatment of Analysis of Variance ANOVA for language researchers ANOVA is the most frequently used technique when handling the outcomes of research designs with more than two treatments or groups This technique is used in all parts of linguistics which deal with observations obtained in survey studies and in quasi experimental research like applied linguistics psycholinguistics sociolinguistics language and speech pathology and phonetics Most statistical textbooks in the social sciences take examples typical of their own field and in addition omit subjects which are particularly relevant for language researchers like power analysis quasi F F1 F2 and minF This book offers a thorough introduction to the basic principles of analysis of variance based on examples taken from language research and goes beyond the conventional topics treated in introductory textbooks as it covers topics like violations of assumptions missing data problems in repeated measures designs alternatives to analysis of variance such as randomization tests and multilevel analysis Each chapter consists of four sections treatment of the subject under discussion a summary of relevant terms and concepts a section devoted to reporting statistics and finally an exercise section After the first introductory chapter in which fundamental concepts like variables cases and SPSS data formats are presented the book continues with two refreshment chapters in which the principles of statistical testing are revised focusing on the well known t test These chapters also deal with the essential but often neglected concepts of statistical power and sample size In every chapter examples of SPSS input and output are given      *Essential Statistics for Applied Linguistics* Hanneke Loerts, Wander Lowie, Bregtje Seton, 2020-02-06 Assuming no prior knowledge this text provides a concise practical and accessible introduction to using analysing and interpreting statistics and methodologies in empirical work using R or JASP It takes an activity based approach in which students are first stimulated to consider a problem or question and find their own solution before the conventional way of solving that problem or question is introduced How To guides on R and JASP which take students step by step through statistical analyses and practical assignments are available on the book s companion website This book will be an invaluable resource for undergraduate and postgraduate students of applied linguistics New to this Edition Now focuses on R and JASP two increasingly popular open source softwares used by linguists How To guides to help students strengthen their understanding and apply what they have learnt available on a companion site Contains more comprehensive coverage of effect sizes basic methods regression theory relationship studies and non parametric tests Accompanying online resources for this title can be found at [bloomsburyonlineresources.com](http://bloomsburyonlineresources.com) essential statistics for applied linguistics These resources are designed to support teaching and learning when using this textbook and are available at no extra cost      Statistics in language studies ,1989      **A Guide to Doing Statistics in Second Language Research Using SPSS** Jenifer Larson-Hall, 2010 This valuable book shows second language researchers how to

use the statistical program SPSS to conduct statistical tests frequently done in SLA research Using data sets from real SLA studies A Guide to Doing Statistics in Second Language Research Using SPSS shows newcomers to both statistics and SPSS how to generate descriptive statistics how to choose a statistical test and how to conduct and interpret a variety of basic statistical tests It covers the statistical tests that are most commonly used in second language research including chi square t tests correlation multiple regression ANOVA and non parametric analogs to these tests The text is abundantly illustrated with graphs and tables depicting actual data sets and exercises throughout the book help readers understand concepts such as the difference between independent and dependent variables and work out statistical analyses Answers to all exercises are provided on the book s companion website along with sample data sets and other supplementary material [Handbook of Research in Second Language Teaching and Learning](#) Eli Hinkel,2011-01-25 This landmark volume provides a broad based comprehensive state of the art overview of current knowledge and research into second language teaching and learning All authors are leading authorities in their areas of expertise The chapters all completely new for Volume 2 are organized in eight thematic sections Social Contexts in Research on Second Language Teaching and Learning Second Language Research Methods Second Language Research and Applied Linguistics Research in Second Language Processes and Development Methods and Instruction in Second Language Teaching Second Language Assessment Ideology Identity Culture and Critical Pedagogy in Second Language Teaching and Learning Language Planning and Policy Changes in Volume 2 captures new and ongoing developments research and trends in the field surveys prominent areas of research that were not covered in Volume 1 includes new authors from Asia Australia Europe and North America to broaden the Handbook s international scope Volume 2 is an essential resource for researchers faculty teachers and students in MA TESL and applied linguistics programs as well as curriculum and material developers [Using Statistics for Language Studies](#) Douglas W. operations are explained in detail and step by step illustrations in the use of R a very powerful online freeware program to perform all calculations are provided A Companion Website extends and enhances the text with PowerPoint presentations illustrating how to carry out calculations and use R practice exercises with answer keys data sets in Excel MS DOS format and quiz midterm and final problems with answer keys [Statistical Learning and Language Acquisition](#) Patrick Rebuschat, John N.
