The Flight from Creation Gustaf Wingren, 2019-05-30 I have always sought to choose topics that throw light on the integrating function of the Christian faith in human life as a whole For this reason I have felt that the modern tendency to cut the church off from ordinary human life is the most profound theological tragedy of our time This statement by noted Swedish theologian Gustaf Wingren reflects his independence from the primary train of theological thought in the twentieth century Where many other theologians following the lead of Karl Barth have centered their theologies around the second article of the Apostles Creed Wingren has re-emphasized the first article in an attempt to recover the theological importance of the doctrine of creation Wingren's view developed in faithfulness to the church's theology is consonant with the increasing demands that world concerns and problems are placing on the church It makes a place for the church within the world not apart from it and it opens up the doors of the church to meet life's problems on their own ground Developed from a series of lectures at the Contemporary Theology Institute in Montreal this is an important theological work Here Wingren explores another facet of a theme that he has consistently maintained in his writing The critical dialog with prominent theologians of recent years develops a strong case for the doctrine of creation as a basic context for theology and leaves no doubt as to which direction the church should move

The Flight of Events German ARCE ROSS, 2024-05-31 The Flight of Events the second book of a Psychopathology of Melancholia Series after Manie m lancolie et facteurs blancs Beauchesne Paris 2009 is a work on altruistic anguishes in manic depressive suicides In this book German Arce Ross has chosen to focus on the psychological processes that occur prior to the act of suicide rather than on the act itself We can detect these processes in a subject during the period between the decision to commit suicide and the passage to the act In the consideration of certain moments preceding a suicidal or criminal act in the case of critical episodes that are non-delusional non-hallucinated and non-acted but sometimes assimilated to psychotic or twilight moments where we locate in particular a discontinuity or a radical rupture albeit momentary with the Other we can observe that there are things facts or events that happen to the subject without any form of control over them whatsoever In these uncontrolled intersubjective events what the subject suffers from is a tendency to undergo the acts that he himself makes others perform During this flight of events it is not entirely true that the subject flees the events of his life it is rather the events that flee

**The Flight into The Unconscious** Wolfgang Giegerich, 2020-03-06 Psychological analysis usually sets its sights upon the patient or upon cultural phenomena such as myths literature or works of art The essays in this volume by contrast have another addressee another subject matter psychology itself Deeply informed by Jung's insight regarding the discipline's lack of an objective vantage point outside and beyond the psyche their Jungian author again and again turns Jung's contribution to psychology around upon itself in the spirit of an immanent critique Cutting to the quick the question is put in its constitution as psychology is Jungian psychology up to the level of what its insight into psychology's lack of an Archimedean point would require Are the interpretations it

gives of its various subject matters alchemy religion the unconscious and the rest matched by its interpretation of itself Has its meeting itself in them had consequences for itself consequences in terms of the fathoming of its own truth Or clinging to the standpoint of empirical observer did it ultimately demur with regards to the question of their truth and its own this despite Jung s having characterized his work as an opus divinum Topics include Jung s psychology project as a response to the condition of the world the smuggling inherent in the logic of the unconscious the closure and setting free dialectic of alchemy and psychology the blindness to logical form problematic the faultiness of the opposition Individual and Collective Jung s communion fiasco his thinking the thought of not thinking the veracity of his Red Book the disenchantment complex and as indicated in the title of this volume Jung s psychology project as a counter speculative flight into the unconscious
