involvement of the Equivalence in the literary translation this points will be discussed broadly The translation is an amazingly broad issue which covers numerous notions of style meaning knowledge of the translation topic which is hard to point out looking at the very basics only Accordingly numerous researches has been carried out since the notion of the translation emerged as an academic study Every translation performance whether an oral or a written is a kind of conscious act leading to operation of rendering some text from the Source Language SL into the Target Language TL Literary translation is an odd art because a literary translator takes someone else s composition and performs it in his own special way However above everything the main point of any translation is for the translator to be the actual specialist within this particular field whether it is religious or technical or any other type of translation

Women and their imposed silence in "The Odyssey" translations Sofia Govoni,2019-07-09 Master s Thesis from the year 2018 in the subject Interpreting Translating grade 108 University of Ferrara language English abstract The main topic of this work is the imposed silence on women in translation an activity that had always been the only intellectual activity that was considered suitable for them The first chapter wanted to define the concept of translation in all its facets and all historical and cultural tendencies Particularly it was observed that translation was suitable for women because of its intellectual inferiority and because of this was the only academical activity suitable for them But in the course of history it became just another tool at the service of the dominant part in society the male part that used it only to oppress women To affirm this all the attempts made by women to break the silence imposed to them were considered starting form the history of the feminist movement and all other ideologies that contributed to create and support the stereotypes imposed on women The second chapter analyses the first English translation of the Odyssey by the Greek poet Homer made by a woman Professor Emily Wilson In fact all the available English translations of this text were made by men that succeeded in reducing women to silence This was an innovative text and to demonstrate this the relevant passages featuring the female protagonists of the book were compared with the version by Peter Green in the attempt to find the main differences not only stylistic but also the ones given by the different gender of the translator Also it was possible to find the sexism that had already been present in the book but was reinforced in all translations Key tool for this analysis was Skopos Theory that puts in the first place the functionality of translation and most of all considers the importance of the cultural aspect in the definition of every translated text Today's Cerberus, Vol. 12 Ato Sakurai,2019-04-30 The confrontation with Orthros reaches its climax but is anyone prepared for the aftermath Then Valentine s Day arrives at last the perfect chance for a confession The girls seize their opportunity to give Chiaki chocolate but which of them will win his heart *Reader's Adviser and Bookman's Manual* ,1921 Journal ...
