Transmission Of Affect:

The Transmission of Affect Teresa Brennan, 2014-01-17 The idea that one can soak up someone else's depression or anxiety or sense the tension in a room is familiar. Indeed, phrases that capture this notion abound in the popular vernacular: negative energy, dumping you, could cut the tension with a knife. *The Transmission of Affect* deals with the belief that the emotions and energies of one person or group can be absorbed by or can enter directly into another. The ability to borrow or share states of mind, once historically and culturally assumed, is now pathologized, as Teresa Brennan shows in relation to affective transfer in psychiatric clinics and the prevalence of psychogenic illness in contemporary life. To neglect the mechanism by which affect is transmitted, the author claims, has serious consequences for science and medical research. Brennan's theory of affect is based on constant communication between individuals and their physical and social environments. Her important book details the relationships among affect, energy, and new maladies of the soul, including attention deficit disorder, chronic fatigue syndrome, codependency, and fibromyalgia.

Digital Transmission Systems

David R. Smith, 2013-11-11 In the development of telecommunication networks throughout the world, digital transmission has now replaced analog transmission as the predominant choice for new transmission facilities. This trend began in the early 1960s when the American Telephone and Telegraph Company first introduced pulse code modulation as a means of increasing capacity in their cable plant. Since that time, digital transmission applications have grown dramatically, notably in the United States, Canada, Japan, and Western Europe. With the rapidity of digital transmission developments and implementation, however, there has been a surprising lack of textbooks written on the subject. This book grew out of my work in research and teaching in digital transmission systems. My objective is to provide an overview of the subject. To accomplish this end, theory has been blended with practice in order to illustrate how one applies theoretical principles to actual design and implementation. The book has abundant design examples and references to actual systems. These examples have been drawn from common carriers, manufacturers, and my own experience. Considerable effort has been made to include up-to-date standards such as those published by the CCITT and CCIR and to interpret their recommendations in the context of present-day digital transmission systems.

The Transmission of Exchange Rate Changes to Agricultural Prices William Liefert, 2009 Movements in exchange rates can change the prices of goods faced by producers and consumers and thereby affect incentives to produce, consume, and trade goods. Exchange rate changes, however, might not be completely transmitted, passed through to domestic prices. Price and exchange rate transmission for ag products is low in most developing economies, partly because of trade policies but also because of inadequate infrastructure and other market deficiencies. During the last 20 years, developed and developing countries have moved away from support policies that impede price and exchange rate transmission toward trade policies that allow transmission, such as tariffs. However, market deficiencies remain as a cause of incomplete transmission.

COVID-19: Channels of transmission to food and agriculture Food and Agriculture Organization of the United Nations ,2020-04-01 FAO is analysing and providing updates on the emerging COVID 19 pandemic s effects on agricultural markets effects that are still largely unknown Most current assessments generally foresee a contraction in both supply of and demand for agricultural products and point to possible disruptions in trade and logistics On the supply side widely different views remain on the duration of the shocks the price dynamics differential impacts between domestic and international markets differences across countries and commodities the likely paths of recovery and the policy actions to remedy the various shock waves On the demand side there is near ubiquitous agreement that agricultural demand and trade would slow down with contractions stemming from a deceleration in overall economic activity GDP growth and rising rates of unemployment While food and agricultural systems are exposed to both demand and supply side shocks symmetric these shocks are not expected to take place in parallel asynchronous since inter alia consumers can draw on savings food stocks and safety nets *The*
