Writing For Whole Language Learning:

The Whole Language Approach to Reading and Writing Instruction, 1991 *Reading and Writing in High Schools* Eric Hobson, Robert Baird Shuman, 1990 Arguing that students should be encouraged frequently to listen to speak to read and to write in all areas of the curriculum and to begin asking the questions that reveal the dependence that exists between various bodies of knowledge this book is based on the whole language theory The book is designed not only to help students learn such specifics as grammar usage and mechanics in real and natural ways but also to provide teachers with opportunities to make linkages with the community and to involve parents and other citizens in school activities Chapters 1 and 2 discuss how people learn and what the whole language approach is Chapter 3 presents the skills of decoding listening and reading chapter 4 considers the skills of encoding speaking and writing The last chapter offers final comments about communication skills A 33 item annotated bibliography is attached KEH

Whole Language Teaching, Whole-hearted Practice Monica Taylor, 2007 This seminal collection brings together the multiple perspectives of whole language educators over the course of the past thirty five years The essays illustrate the complex ways in which whole language teachers have been and continue to be political activists through their interactions with students the teachers beliefs about teaching learning and curriculum their commitment to critical thinking and social justice their collaborative engagements with other teachers their role as leaders of change in schools and communities and finally their activism in society Although many believe that we are living in a climate where the term whole language is considered taboo the contributors to this book demonstrate hopefulness for the future of whole language as Yetta and Ken Goodman write in the concluding chapter whole language is alive and well

Approaches and Methods in Language Teaching Jack C. Richards, Theodore S. Rodgers, 2001-03-12 In addition to the approaches and methods covered in the first edition this edition includes new chapters such as whole language multiple intelligences neurolinguistic programming competency based language teaching cooperative language learning content based instruction task based language teaching and The Post Methods Era
