The Doomsday Factor:

The Doomsday Factor Glenn L. Anderson, 1988 The Tidewater Tales John Barth, 1997-02-15 Barth's richest most joyous novel yet describes a couple's journey on the Chesapeake Bay a cruise that overflows with stories of past lives and love entanglements with the CIA and toxic waste and inventive brushes with Don Quixote Odysseus and Scheherazade

God, the Multiverse, and Everything Rodney D. Holder, 2017-03-02 Modern cosmology tells us that the universe is remarkably fine tuned for life If the constants of physics or the initial conditions at the Big Bang were different by the smallest of margins then the universe would have been dull and lifeless Why should the universe be so accommodating to life Many cosmologists believe that the existence of many universes can explain why ours is so special In this book Rodney Holder subjects this multiverse hypothesis to rigorous philosophical critique A multitude of problems is exposed Going substantially further than existing treatments Holder argues that divine design is the best explanation for cosmic fine tuning specifically that design by God is a superior explanation in terms of both initial plausibility and explanatory power and is therefore the most rational position to take on the basis of the cosmological data *Quick(er) Calculations* Trevor Davis Lipscombe, Trevor Lipscombe, 2021 Finalist of the 2022 PROSE Awards How fast can you calculate Would you like to be faster This book presents the time honored tricks and tips of calculation from a fresh perspective to boost the speed at which you can add whether a couple of numbers or columns so long an accountant may faint Find out how to subtract multiply divide and find square roots more quickly What's more this book gives suggestions for how to find answers that are good enough for tricky tasks like dividing by 17 It includes brand new ways to multiply and divide irrational numbers such as pi e the square root of 2 and the golden ratio It has sections devoted to ancient mathematics and the techniques we can borrow from previous and other cultures in order to calculate more quickly Examples some serious some fun come from everyday life or from history like hot dog eating competitions the Vatican's cricket team the molecular weight of the molecule with the world's longest name and the amount of people taken by Henry VIII to arguably history's biggest party the Field of the Cloth of Gold In an age of timed multiple choice questions the swifter you can sum or rule out wrong answers the better you will do If you love to play with numbers this book will be recreational reading And if you ever wonder whether simple arithmetic problems can crop up in everyday life this book provides a fresh perspective John Barth and Postmodernism Berndt Clavier, 2007 John Barth's eminence as a postmodernist is indisputable However much of the criticism dealing with his work is prompted by his own theories of exhaustion and subsequent replenishment leaving his writing relatively untouched by theories of postmodernism in general This book changes that by focusing on the relationship between Barth's aesthetic and the ideology critique of the historical avant gardes which were the first to mobilize art against itself and its institutional practices and demands Examining Barth's metafictional parodies in the light of theories of space and subjectivity Clavier engages the question of ideology critique in postmodernism by offering the montage as a possible model for understanding

Barth's fiction In such a light postmodernism may well be perceived as a mimesis of reality particularly a recognition of the collective nature of self and the world Ceres, 1973 FAO review on development varies **Maryland Our Maryland** Mary Virginia Geiger, 1987 This book is the outcome of a series of scholarly lectures given at the College of Notre Dame of Maryland in 1984 to commemorate the 350th anniversary of the Founding of Maryland Each lecture focused on the importance of Maryland as a colony and state showing the contribution Maryland made to the nation over three and one half centuries **The Pittsburgh Survey** Paul Underwood Kellogg, 1914 Dynamic Modelling and Control of National Economies, 1989 Nicos M. Christodoulakis, 1990 The Symposium aimed at analysing and solving the various problems of representation and analysis of decision making in economic systems starting from the level of the individual firm and ending up with the complexities of international policy coordination The papers are grouped into subject areas such as game theory control methods international policy coordination and the applications of artificial intelligence and experts systems as a framework in economic modelling and control The Symposium therefore provides a wide range of important information for those involved or interested in the planning of company and national economics Monthly Bulletin ... of the Iowa State Board of Health, 1926 **San José Studies**, 1993 **The Friday Book** John Barth, 1997 The Friday Book was the first work of nonfiction by novelist John Barth author of *The Sot-Weed Factor* *Giles Goat Boy* and *Chimera* Taking its title from the day of the week Barth would devote to nonfiction the three dozen essays discuss a wide range of topics from the blue crabs of Barth's beloved Chesapeake Bay to weighty literary subjects such as Borges Homer and semiotics www.amazon.com **Australasian Journal of American Studies**, 1989 *Argument and Analysis* Lynn Beene, Krystan V. Douglas, 1989 *Mid-Atlantic Country*, 1986 **Factors in Modern History** Albert Frederick Pollard, 1919 *Canadian Work Values* M. Burstein, 1975 **Factors in Modern History** A. F.
