## **Topics In The Theory Of Functions Of Several Complex Variables:**

*Topics in the Theory of Functions of Several Complex Variables* William Osgood, 1913      **Topics in the Theory of Functions of Several Complex Variables** William Fogg Osgood, 1914      **Topics in the Theory of Function of Several Complex Variables**, 1914      *Analytic Functions of Several Complex Variables* Robert Clifford Gunning, Hugo Rossi, 2009

The theory of analytic functions of several complex variables enjoyed a period of remarkable development in the middle part of the twentieth century This title intends to provide an extensive introduction to the Oka Cartan theory and some of its applications and to the general theory of analytic spaces      **Functions of Several Complex Variables and Their Singularities** Wolfgang Ebeling, 2007 The book provides an introduction to the theory of functions of several complex variables and their singularities with special emphasis on topological aspects The topics include Riemann surfaces holomorphic functions of several variables classification and deformation of singularities fundamentals of differential topology and the topology of singularities The aim of the book is to guide the reader from the fundamentals to more advanced topics of recent research All the necessary prerequisites are specified and carefully explained The general theory is illustrated by various examples and applications      **Several Complex Variables** Raghavan Narasimhan, 1971 Drawn from lectures given by Raghavan Narasimhan at the University of Geneva and the University of Chicago this book presents the part of the theory of several complex variables pertaining to unramified domains over  $\mathbb{C}$  Topics discussed are Hartogs theory domains in holomorphy and automorphism of bounded domains      **Topics in the Theory of Functions of Several Complex Variables** William Fogg Osgood, 1966      **Topics in Several Complex Variables** Zair Ibragimov, Norman Levenberg, Sergey Pinchuk, Azimbay Sadullaev, 2016-04-21 This volume contains the proceedings of the Special Session on Several Complex Variables which was held during the first USA Uzbekistan Conference on Analysis and Mathematical Physics from May 20-23 2014 at California State University Fullerton This volume covers a wide variety of topics in pluripotential theory symplectic geometry and almost complex structures integral formulas holomorphic extension and complex dynamics In particular the reader will find articles on Lagrangian submanifolds and rational convexity multidimensional residues S-parabolic Stein manifolds Segre varieties and the theory of quasianalytic functions      **Lectures on Several Complex Variables** Paul M. Gauthier, 2014-11-07 This monograph provides a concise accessible snapshot of key topics in several complex variables including the Cauchy Integral Formula sequences of holomorphic functions plurisubharmonic functions the Dirichlet problem and meromorphic functions Based on a course given at Universit de Montr al this brief introduction covers areas of contemporary importance that are not mentioned in most treatments of the subject such as modular forms which are essential for Wiles theorem and the unification of quantum theory and general relativity Also covered is the Riemann manifold of a function which generalizes the Riemann surface of a function of a single complex variable and is a topic that is well known in one complex variable but rarely treated in several variables Many details which

are intentionally left out as well as many theorems are stated as problems providing students with carefully structured instructive exercises Prerequisites for use of this book are functions of one complex variable functions of several real variables and topology all at the undergraduate level Lectures on Several Complex Variables will be of interest to advanced undergraduate and beginning undergraduate students as well as mathematical researchers and professors
