Smart Organization:

The Smart Organization David Matheson, Jim Matheson, 2016-12-08 Why do some firms deliver a stream of successful products and services while others continually make poor R open information flow system thinking and developing a value creation culture Once in place these values enable companies to make appropriate choices about their R D planning portfolio management and project and business strategies The authors stress the importance of evaluating trade offs creating alternatives balancing risk and return and getting buy in across functional areas to ensure that decisions will be viable from both technical and management perspectives If more companies were to act like this there might be less demand for off the peg strategies from consultants The Economist July 11 1998

Smart Organizations in the Public Sector Hanna Godlewska-Majkowska, Tomasz Pilewicz, Patrycjusz Zarębski, 2023-07-07 How does a smart organization model enable self governments to lead local and regional development in a sustainable and resilient manner What are key aspects of smart organizations impacting the success of self governments in attracting and retaining residents entrepreneurs and investors Smart organizations became a relevant construct in economic and management sciences They supply many practical applications for self governments and public sector organizations that are looking for effective ways to leverage their resources and capabilities in the local and regional development process This research monograph indicates how factors of smart organizations in local administration lead to sustainable and resilient development processes In parallel the monograph is a practical guide for local government managers looking for the best international practices in collecting researching and interpreting data for making decisions that influence the competitiveness and market position of locations they govern

The Smart Organization David Matheson, James E. Matheson, 1998 The Smart Organization brings new perspective to management decision making throughout the organization It identifies the key practices that enable successful organizations to deliver a stream of winning products and services Smart organizations say the Mathesons have internalized nine interlocking principles essential in creating corporate cultures that emphasize making the right strategic decisions at the right time They use best practices to support these decisions and sustain their success These principles among them embracing uncertainty disciplined decision making and value creation culture enable companies to make appropriate choices about their R D planning portfolio management and product strategies Drawing on the experiences of R D intensive organizations all over the globe the authors illustrate the book with best practice examples from companies like Hewlett Packard 3M Merck Procter Gamble DuPont Monsanto and AT T They stress the importance of evaluating tradeoffs investigating alternatives and getting buy in across functions to ensure that decisions will be viable from both the technological and the managerial perspective They show how managers can apply these methods more broadly to create a smart organization The Mathesons clearly demonstrate that changing the decision making process is an efficient means of reforming culture and improving not just R D but overall company performance

Smart Organizations in Industry 5.0

Sebastian Saniuk, Sandra Grabowska, Anna Adamik, 2024-12-31 The Fourth Industrial Revolution means the widespread digitization of economic processes using more economical and efficient production technologies. Orientation towards productivity, flexibility, and low production costs results in a slow process of dehumanization of industry and focus only on implementing digital technologies of Industry 4.0. A natural consequence of this trend is the concern of workers, governments, and societies about new challenges and the role of humans in industry and the economy. The hope is the emergence of a new industry concept proposed by the European Commission that expands the features of the existing Industry 4.0 concept to include human-centric, environmental, and resilience aspects in smart organizations. Industry 5.0 is an excellent alternative to the development of today's digital and dehumanized world, and this book presents challenges and priority directions for smart organizations in an environment shaped by the pillars of Industry 5.0. This research volume discusses the development of technologies that support human-oriented work systems, sustainable production, and system resilience in intelligent organizations. It presents an educational challenge for universities and vocational schools in preparing employees for intelligent organizations and will be of interest to researchers, academics, policymakers, and students in the fields of organizational studies, knowledge management, and the digital economy.
