

GET WATER WISE AT HOME

The world's supply of clean, usable water is decreasing faster than it can be replaced. With climate change concerns and pervasive droughts, nearly everyone is looking for ways to conserve resources and cut costs. With just a few small changes, we can build a sustainable future together and protect our most precious resource. Let's get Water Wise, Spokane!

Re-Purpose Water

When you change the water in your fish tank, reuse it to water your plants. This also acts as a natural fertilizer.

Go Low and Slow the Flow

Using a low-flow showerhead could save 10,000 gallons per year and 10% on your energy bill.

Accessorize Your Faucet

Installing a low-flow aerator is one of the most cost-effective ways to save water. You can increase the faucet's efficiency by 30% without sacrificing performance.

Cet Flush with Savings

Fill a 1/2 gallon plastic container with water or gravel and place in the tank to save 1/2 gallon every flush.

Catch a Running Toilet

A leaky toilet can waste 200 gallons every day! Add food coloring to the tank. If the color makes it into the bowl within 15 minutes, you have a leak.

Chill Out

There is a pitcher of water in the fridge instead of letting the frig run until it's cool while you're at it. Three frozen loaves in the refrigerator instead of using running water.

Fill 'er Up

Wash full loads of dishes to maximize your water savings. Using a dishwasher instead of hand washing dishes potentially saves 30-40 gallons.

Lighten Your Load

Installing a high-efficiency machine will use 50% less water. Loading only full loads of laundry makes the most of the washing cycle.

Think at the Sink

Use short blasts to rinse dishes instead of running water. This saves nearly 5,000 gallons a year.

No Cup Left Behind

Before you dump your old glass of water down the sink, look for a thirsty plant to make happy.
