The 5x questions checklist for an effective hybrid workplace model

01 What do people want?

As mentioned above, a successful hybrid work strategy and hybrid workplace model can only work if it's designed for the people.

Before making any significant decisions or investments, it's important to understand the preferences, needs and expectations of the people you want to work for. This includes understanding their work styles, their preferences for work environments, their needs for flexibility and their expectations for support.

The way to build a hybrid work model is to start with the people and work backwards. This means understanding what people want and then designing a hybrid work model that meets those needs.

How do you know if you've designed a hybrid work model that meets the needs of your people? The answer is simple: by asking them. You should regularly check in with your people to see how they're doing and what they need. This will help you make adjustments as needed.
