It aims to assist organisations in making the shift from a narrow strong technical focus on project management to a broader more business oriented focus. The Practice of Project Management introduces three basic concepts which underpin the philosophy of the business oriented approach: Business Focused Project Management (BFPM) which takes an organisation wide view, The Wrappers Model and Objective Directed Project Management (ODPM) both of which provide the philosophies, processes, concepts and tools used to enable BFPM. [Project Management Software Survey](#) Project Management Institute, 1999 Offers an efficient way to compare and contrast the capabilities of a wide variety of project management tools. More than two hundred software tools are listed with comprehensive information on system features, how they perform, time analysis, resource analysis, cost analysis, performance analysis, cost reporting and how they handle multiple projects, project tracking, charting and much more.
