

Table 1. Physiological effects of SNS and PSNS stimulation

Target organ (effector)	Effect of sympathetic stimulation	Effect of parasympathetic stimulation
Eyes	Dilates pupil, relaxes ciliary muscle	Constricts pupil, contracts ciliary muscle
Salivary glands	Inhibits saliva secretion	Stimulates saliva secretion
Lungs	Dilates bronchioles	Constricts bronchioles
Heart	Increases heart rate	Decreases heart rate
Stomach/intestinal wall	Decreases motility	Increases motility
Digestive system glands	Decreases secretion of digestive enzymes and insulin	Increases secretion of digestive enzymes and insulin
Bladder	Delays emptying, relaxes detrusor muscle, constricts sphincter	Empties bladder, contracts detrusor muscle, relaxes sphincter
Blood vessels	Peripheral vasoconstriction, muscle vasodilation, increases blood pressure	No effect
Liver	Converts glycogen to glucose and releases into the blood	No effect
Sweat gland	Secretes sweat	No known effect
Adrenal gland	Secretes adrenaline	No known effect

SNS = sympathetic nervous system; PSNS = parasympathetic nervous system.

System Effects

Katrin Zwirgmaier

System Effects:

System Effects Robert Jervis, 1998-12-28 Based on more than three decades of observation Robert Jervis concludes in this provocative book that the very foundations of many social science theories especially those in political science are faulty Taking insights from complexity theory as his point of departure the author observes that we live in a world where things are interconnected where unintended consequences of our actions are unavoidable and unpredictable and where the total effect of behavior is not equal to the sum of individual actions Jervis draws on a wide range of human endeavors to illustrate the nature of these system effects He shows how increasing airport security might actually cost lives not save them and how removing dead trees ostensibly to give living trees more room may damage the health of an entire forest Similarly he highlights the interconnectedness of the political world as he describes how the Cold War played out and as he narrates the series of events with their unintended consequences that escalated into World War I The ramifications of developing a rigorous understanding of politics are immense as Jervis demonstrates in his critique of current systemic theories of international politics especially the influential work done by Kenneth Waltz Jervis goes on to examine various types of negative and positive feedback bargaining in different types of relationships and the polarizing effects of alignments to begin building a foundation for a more realistic more nuanced theory of international politics *System Effects* concludes by examining what it means to act in a system It shows how political actors might modify their behavior in anticipation of system effects and it explores how systemic theories of political behavior might account for the role of anticipation and strategy in political action This work introduces powerful new concepts that will reward not only international relations theorists but also all social scientists with interests in comparative politics and political theory

Beyond Probiotics: Dietary Microbial Modulators of the Immune System - Effects and Mechanisms Margarida Castell, Francisco José Pérez-Cano, Gemma Emily Walton, 2022-03-25

Nutritional and Environmental Modulation of the Endocrine System: Effects on Metabolism and Growth Oliana Carnevali, Encarnación Capilla, 2019-11-05 The present eBook is the result of the Frontiers Research Topic entitled Nutritional and environmental modulation of the endocrine system effects on metabolism and growth It contains 12 chapters comprising 7 original research articles 3 reviews and 2 minireviews The objective of the Research Topic was to provide a multidisciplinary approach of cutting edge research on metabolism and growth aiming to address key questions about the interplay between nutritional environmental or other external factors i e temperature or pollutants and signals modulating feed intake with the endocrine system regulating these processes Evidences about the molecular principle behind the complex interactions of all these factors on the control of the endocrine and nervous systems regulating the metabolic process are presented The knowledge provided by this eBook focusing in cells model organisms and farmed species have highlighted the importance of dietary and environmental factors and their interactions with the endocrine system to regulate growth and metabolism

Septic Tank System Effects on Ground Water

Quality Canter,1985-04-01 This valuable reference delineates the ground water quality concerns associated with the planning and usage of septic tank systems Septic tank systems represent a significant source of ground water pollution in the United States Since many existing systems are exceeding their design life by several fold the usage of synthetic organic chemicals in the household and for system cleaning is increasing and larger scale systems are being designed and used A System of Physiologic Therapeutics: Pneumotherapy inhalation Solomon Solis-Cohen,1903 **The Technology of Sugar** John Geddes M'Intosh,1916 Bert sugar Carbonation and filtration Concentration Boiling extraction diffusion evaporations defecation refining chemistry *Toxicological Profile for Otto Fuel II and Its Components* ,1995 *System of Diseases of the Ear, Nose, and Throat: Diseases of the ear.
