Verbal Decision Analysis For Unstructured Problems:

Verbal Decision Analysis for Unstructured Problems Oleg I. Larichev,Helen M. Moshkovich,2013-11-11 A central problem of prescriptive decision making is the mismatch between the elegant formal models of decision theory and the less elegant informal thinking of decision makers especially when dealing with ill structured situations This problem has been a central concern of the authors and their colleagues over the past two decades They have wisely to my mind realized that any viable solution must be informed by a deep understanding of both the structural properties of alternative formalisms and the cognitive demands that they impose on decision makers Considering the two in parallel reduces the risk of forcing decision makers to say things and endorse models that they do not really understand It opens the door for creative solutions incorporating insights from both decision theory and cognitive psychology It is this opportunity that the authors have so ably exploited in this important book Under the pressures of an interview situation people will often answer a question that is put to them Thus they may be willing to provide a decision consultant with probability and utility assessments for all manner of things However if they do not fully understand the implications of what they are saying and the use to which it will be put then they cannot maintain cognitive mastery of the decision models intended to represent their beliefs and interests

Multiple Criteria Decision Analysis Salvatore Greco,Matthias Ehrgott,José Rui Figueira,2016-02-18 In two volumes this new edition presents the state of the art in Multiple Criteria Decision Analysis MCDA Reflecting the explosive growth in the field seen during the last several years the editors not only present surveys of the foundations of MCDA but look as well at many new areas and new applications Individual chapter authors are among the most prestigious names in MCDA research and combined their chapters bring the field completely up to date Part I of the book considers the history and current state of MCDA with surveys that cover the early history of MCDA and an overview that discusses the pre theoretical assumptions of MCDA Part II then presents the foundations of MCDA with individual chapters that provide a very exhaustive review of preference modeling along with a chapter devoted to the axiomatic basis of the different models that multiple criteria preferences Part III looks at outranking methods with three chapters that consider the ELECTRE methods PROMETHEE methods and a look at the rich literature of other outranking methods Part IV on Multiattribute Utility and Value Theories MAUT presents chapters on the fundamentals of this approach the very well known UTA methods the Analytic Hierarchy Process AHP and its more recent extension the Analytic Network Process ANP as well as a chapter on MACBETH Measuring Attractiveness by a Categorical Based Evaluation Technique Part V looks at Non Classical MCDA Approaches with chapters on risk and uncertainty in MCDA the decision rule approach to MCDA the fuzzy integral approach the verbal decision methods and a tentative assessment of the role of fuzzy sets in decision analysis Part VI on Multiobjective Optimization contains chapters on recent developments of vector and set optimization the state of the art in continuous multiobjective programming multiobjective combinatorial optimization fuzzy multicriteria optimization a review of the field of goal programming interactive methods for solving multiobjective optimization problems and relationships between MCDA and evolutionary multiobjective optimization EMO Part VII on Applications selects some of the most significant areas including contributions of MCDA in finance energy planning problems telecommunication network planning and design sustainable development and portfolio analysis Finally Part VIII on MCDM software presents well known MCDA software packages **Multiple Criteria Decision Analysis: State of the Art Surveys** José Figueira,Salvatore Greco,Matthias Ehrgott,2005 MULTIPLE CRITERIA DECISION ANALYSIS State of the Art Surveys is the most comprehensive work available to survey the state of the art in MCDA to date Its 25 chapters are organized in eight parts and are written by 52 international leading experts Each of these parts covers one of the central streams of multiple criteria decision analysis literature These literature streams are MCDA today Foundations of MCDA Our Ranking Methods Multiattribute Utility Theory Non Classical MCDA Approaches Multiobjective Mathematical Programming Applications and MCDM Software The handbook presents the most up to date discussions on well established methodologies and theories in the field while systematically surveying emerging fields in MCDA such as conjoint measurement fuzzy preferences fuzzy integrals rough sets etc MULTIPLE CRITERIA DECISION ANALYSIS State of the Art Surveys is a valuable reference volume more than 2000 references for the field of decision analysis It provides graduate students researchers and practitioners with a sweeping survey of MCDA theory methodologies and applications It is a handbook that is particularly suitable for use in seminars in Decision Analysis Decision Support and Decision Theory Advances in Decision Analysis Nadine Meskens,M.R. Roubens,2013-03-09 The present book fmds its roots in the International Conference on Methods and Applications of Multiple Criteria Decision Making held in Mons in May 1997 A small number of contributions to that conference were selected via a refereeing procedure and retained authors were requested to include in their final version their more recent results This explains why some papers differ significantly from the original presentation The introductory paper of Raynaud addresses the long range forecasts in Multiple Criteria Decision Making on the basis of a Delphi process that was run before and during the congress In a second part the French author explains how he and some of his partners could find the proof of an important conjecture the iteration of a strongly monotonic choice function is not a strongly monotonic ranking function The second part of the book covers methodological aspects of decision theory The contribution of Bouyssou and Pirlot concerns the reformulation of classical conjoint measurement models that induce a complete and transitive preference binary relation on the set of alternatives which seem to be unrealistic when decision makers are asked to compare objects evaluated on several attributes The authors propose to consider non transitive non complete and non additive decomposable conjoint models They define properties that characterize such models Encyclopedia of Decision Making and Decision Support Technologies Patrick Humphreys,2008 Presenting a critical mass of the most up to date research on human and computer support of managerial decision making this reference includes discussions on support of operational tactical and strategic decisions and much more *Interfaces*
